Acknowledgement

Words are often too less to reveal one’s deep regards. An understanding of the work like this is never the outcome of the efforts of a single person. I take this opportunity to express my profound sense of gratitude and respect to all those who helped me through the duration of this Ph.D. Thesis.

First, I would like to thank the Supreme Power, the GOD, since born to till now for each moment give their support, being with me and always guided me to work on the right path of life. Without his grace, this would not have been possible.

I am extremely grateful to my supervisor Dr. K. Ramamurthi, Professor and Head, school of Physics, Bharathidasan University, India for his patience, advice and moral support. Without his continuous guidance I would still be wandering among enormous research possibilities in the area of material science.

I will also grateful to Prof. Dr. Dr. h.c. Dietrich R.T. Zahn, for accepting me in his group carry out a part of my research work under DAAD sandwich model fellowship program and providing all the necessary facilities to carryout Ph.D work. Also, I am very much inspired by his group meetings that have motivated me about various advancements in new organic thin film materials.

I wish to express my sincere thanks to my cosupervisor Dr. Ovidiu Gordon, Technical University of Chemnitz, Germany for initiating last part of the work on pentacene OFET and synthesis of new pentacene derivatives for OFETs. I am grateful for his timely help and suggestions during the thesis preparation and in many other aspects he taught me in the technical field and synthesis part.

My sincere thanks to Prof. Dr. Klaus Banert, Technical university of Chemnitz, Germany for giving me an opportunity to work in Organic chemistry laboratory and his inspirable guidance, continuous encouragement throughout my synthesis part of pentacene.

My sincere thanks to Doctoral committee member, Dr. A. Ilango, Associate Professor, School of Chemistry, Bharathidasan University. I am grateful to him for his kind encouragement and valuable suggestions regarding my research plans and always have been consistent in enquiring about my research progress.

My sincere thanks to Dr. K. Jeganathan, Co-ordinator and Associate Professor, Centre for nanoscience and nanotechnology, School of Physics, Bharathidasan University, Tiruchirappalli - 620 024, who directed me towards my organic semiconductors.

I am grateful to Dr. Biswajit Saha, Organic chemistry, TU Chemnitz, Germany for his encouraging and lot of help to synthesis of the pentacene derivatives and to improve my knowledge on synthesis part.
With a sense of gratitude, I remember Prof. M. Lakshmanan, Prof. M. Daniel, Prof. V. Parthasarathi, Prof. P. Kaliannan, Prof S. Dhanuskodi, Prof. S. Rajasekar, Prof. S. Arumugam, Dr. K. Tamilmaran, Dr. P. Murugnantham, Dr. R. Ramesh Babu and Dr. Jeevanram faculty members of the School of Physics, Bharathidasan University, Tiruchirappalli – 620 024

I am grateful to Dr. Reji Philip, Associate Professor, Raman Research Institute, Bangalore and Dr. D. Sastikumar, Professor, Dr. Gobi, NIT Trichy for Z scan studies.

I am grateful to Dr. K. Udayalakshmi, Assistant Professor, Saveetha University for her invaluable support and scientific discussions. I wish to express my sincere thanks to Dr. E. Elangovan, Dr. T. Balakrishnan, Dr. V. Krishnakumar, Dr. R. Kumaravel and Dr. S. Parthiban for valuable guidance during my initial stages of research work.

I gratefully extend my sincere thanks to Mr. M. Albert, Mr. M. Kanagasundaram and Mr. M. Johnson, Central Workshop, Bharathidasan University for their constant help during my research work. I extend my sincere thanks to non-teaching staffs of School of Physics, Bharathidasan University.

I am indebted to Ms. Iulia Korodi, Research student, from whom I learned the experimental techniques and Organic Field Effect Transistors preparation and all my colleagues, Semiconductor Physics, Technical University of Chemnitz, Germany. Especially, thanks to all scientific employees of Semiconductor physics, TU Chemnitz, Germany.

I extend my thanks to Frau. Raschke Sybille, secretariat, Semiconductor Physics, TU Chemnitz, for her kind help and necessary official communications in proper time.

This thesis would not have been possible without the diligence and energy of my colleagues Ms. A. Subashini, Mr. V. Gokulakrishnan, Ms. P.V. Bhuvaneshwari, Ms. R. Santhakumari, Ms. L. Jothi and my juniors Ms. J. Vidhya, Ms. J. Jayasudha, Mr. Arunachalasam, Ms. S. Brindha, Mr. S. Raja, Mr. L. Moorthi of School of Physics and Mr.V. Purusothaman, Centre for Nanoscience and Nanotechnology, School of Physics, Bharathidasan University.

I extend my thanks to my friend, Mr. Venkatesh, Mr. Ganesh, Mr. Sathish Kannan, Ms. T. Mahalakshmi, D. Azhagan from School of Chemistry, Bharathidasan University.

I extend my thanks to Suchand Sandeep, Remya and Athira from RRI, Bangalore, for Z scan measurements.

My deepest gratitude goes to my family for their unflagging love and support throughout my life; this thesis is simply impossible without them. I am indebted to my daddy, Mr. L. Sundararaman, mummy Suseela and all my sisters and their children (Saran, Priya, Hari,
Sudha, Nivedha, Dharani). My Family provides the best possible environment for me to grow up and attend school. Every breath of my life, drop of blood in my body dedicated to them I wish to record in words and in my heart, my deepest gratitude to my dad all of whom have given me the strong encouragement and peace of mind whenever it was most required.

A Sense of gratitude to my special person Mr. S. Sathish Kumar, Fellow, EGRL, I can’t say thank you enough for his tremendous support and help. I feel motivated and encouraged every time to discuss with him. Without his encouragement and guidance this project would not have materialized.

My special thanks to my dear most friend Ms. T. Deepa Rani for everything, in particular always available and help to me at critical situation and gives more than moral support.

I recall and acknowledge of my friends M.K. Murali, Kanna and Ammu

My utmost thanks to my life partner Mr. Kubendran for his constant source of inspiration, encouragement and support throughout my research period. Finally I thank LORD MURUGA for placing the right events and people at the appropriate time in my life despite myself.

I sincerely acknowledge the financial support provided by University Grant Commission (UGC), New Delhi for the award of research fellowship. I would like to acknowledge German Academic Exchange service (DAAD), German for the award of DAAD Sandwich model fellowship.

S. Leda
