Acknowledgement

It was Prof. Subrahmanian who introduced me to the fascinating area of industry and technology. Despite his ailment he took keen interest in my work and ungrudgingly spared his time without which this work would not have been completed. Indeed my obligation to him is much more than can be presented in a few words. My other supervisor, Dr. Mohanan Pillai, despite the many "inconveniences" caused by me, was always a source of inspiration and encouragement. I record my sense of gratitude to him. I am also thankful to Prof. Surendra Patel for the very useful discussions I had with him in the initial days of this work.

Prof. P.S. George was instrumental in convincing me of the hazards involved in dragging this work indefinitely. I am thankful to him for all the encouragement given to me. D. Narayana took a keen interest in the progress of my work, patiently listened to the problems that cropped up in the course of this work and readily came up with new ideas to help solve them. His comments on an earlier draft was of great help.

Shri Ashok Parthasarathi has shown keen interest in this study from the very beginning and provided me with valuable insights. Despite his numerous preoccupations he spared many useful hours for discussions to clarify various issues. It was Shri Jairam Ramesh who introduced me to Parthasarathi and many other experts in government and industry. He was very generous to me in sparing his time for responding to my queries and in extending me the much needed help during my field visits. My
heart-felt gratitude to Shri Parthasarthi and Shri Jairam Ramesh.

I also use this opportunity to acknowledge Dr. N.S. Siddarthan, Prof. Sudipdo Mundle, Dr. V. Siddarthan, D. Abrol, and Pradhosh Nath for the many useful discussions I had with them. I am also grateful to Prof. P.R. Sengupta, Prof. A.K. Das Gupta and Shri Ramamoorthi for all the help given to me while I was in IAMR.

I will be failing in my duty if do not acknowledge many officials in Department of Electronics, particularly, Dr Sarnot and Dr Dharmadhikari for information that was crucial to this study.

Coming back to the faculty members in Centre - Thomas Issac, Michael Tharakan, Sakthi Padhi, B. G. Kumar, Pushpangathan, Mridul Eapen - were always ready to spare time for discussions and were a source of encouragement. I wish to record my profound sense of gratitude to them.

Many thanks to Damodaran and Latha for the nice time that I had with them. The pleasant company of Sanandan, Sukumar, Raju Francis, Mrs Aggarwala, Mrs Manoja and Mr Soni enabled me to sustain my interest in my thesis work while I was away in Delhi.

I would also like to acknowledge Nagaraj, Sebastian and Mani for the interest they have shown in my work and for the hospitality extended to me while I was in Hyderabad in connection with my work.
My colleagues in centre - Hari, Pyare, Sunny, Rammohan, Haseeb - were always patient to listen my half-baked ideas and react to it. To my other friends - Rajendran, Varghese, Roy, Murali, Anil, Shajahan, Joji, Rajagopal, Suresh, Alice, Anitha, Mohankumar, Sundaresan & Jose Jacob - I am thankful for their nice camaraderie which helped me to overcome the travails of thesis writing.

Even with most choicest of words, I doubt, I can express my sense of indebtedness to Baby Antony and Emily who were always with me in my ups and downs. I am also thankful to shri Joshi, Sudhakaran and Thachil for being a source of moral support.

I would like to thank the professional assistance from the centre, especially from the library and office during my long academic pursuit.

The hospitality and beneficence of Padma Chechi, Kamalesh and Deepthi spared me from any homesickness. Above all I am most indebted to my mother, my sisters Thanki and Thara, my brother-in-laws Varghese and George for being a source of enduring support.
