ACKNOWLEDGEMENT

First of all, I would like to bow my head in gratitude to the Almighty who gave me the intellectual strength to accomplish the writing of my PhD thesis. I express my acknowledgements to all not as a matter of convention but as a true expression of my gratefulness to all the people who helped me and stood by me during the completion of my thesis.

I may fall short of words while mentioning about the two great souls who are accountable to me right from my first breath of life, Ammi and Papa. They are the architects of my carrier. They have always been my strength who nurtured me till date and their inexhaustible confidence in me, imbibed me to achieve whatever I am today.

With great regard and extreme reference, I wish to acknowledge my profound gratitude to my supervisor, Dr. Shagufta Moin, for her considerate guidance, encouragement and benevolence. Through this journey of experimentation and learning, she has been an unfaltering pillar of encouragement, optimism and inspiration. Her share of abstract reasoning, experience and constructive criticism broadened the horizons of my knowledge, scientific temperament and experience not only in academics but also in my practical life. I owe this work to her.

I am extremely thankful to my co-supervisor, Dr. Mohammad Owais, Interdisciplinary Biotechnology Unit, for powerful and inspirational guidance. His high thinking and lofty ideals really elevated my confidence level and propelled me to work for fetching best results out of the given conditions.

I would also like to thank Dr. Sheelu Shafique, Rajiv Gandhi Centre for Diabetes and Endocrinology, and Dr. Rizwan, Interdisciplinary Biotechnology Unit, for their vital help and support needed to carry out my research work.

I owe a deep sense of gratitude to Prof. Najmul Islam, Chairman Department of Biochemistry to facilitate all the requirements to conduct my research work. I would also like to thank Prof. Asif Ali, who extended his immense help during his chairmanship of the department.

I am deeply indebted to all my teachers, Dr. Mashiat-Ullah Siddique, Dr. Abul Faiz Faizy, Dr. Khursheed Alam, Dr. Moinuddin, and Mrs. Khushtar A. Salman for their invaluable and constant guidance. My sincere thanks goes to Prof. Tabassum Shahab and
Dr. Nasreen for their kind suggestions and moral support during various phases of my academic life.

Besides, I would also like to thank my lab colleagues, Dr. Ricky, Dr. Manzoor, Dr. Sufia, Dr. Tariq, Dr. Shahnawaz and Naureen for their help at various stages of the journey of my research life. Their tangible and intangible inputs to my life, unconditional help, cooperation and understanding during my PhD life are beyond merely thanking.

I thank Almighty that I could meet, know and spend very good times with a magnificent human being in my life, Dr. Iftekhar Hassan. My acknowledgment would be incomplete if I don’t offer my special thanks to my friends, Dr. Taqi, Dr. Sandesh, Badar, Parvez, Yasir, Rouf, Wasil Bhai, Dr. Farzana, Asif, Dr. Rabbani, Dr. Akif, Dr. Jyoti and my juniors Dr. Shaziya, Dr. Reena, Sidra and Neelofar whose timely advice and warnings saved me from making many mistakes during my research work and in life in the department. I take this opportunity to thank my friends and seniors including,

And now comes the turn of people who have been the prime movers behind my colorful and happening life. I am indebted to my sister Nazia, Roohi Baji and brother Rizwan for their affection and untiring assistance through the years. I would also like to thank my relatives, neighbours and in-laws who have been a pillar of support during all times good or bad. No words can express my appreciation and gratefulness for my best friend Gulnazir, who had always been a sink for my sorrows. I would also like to express my sincere gratitude towards Naved Sir, Hamzah, Aiman and Maryam for their support and cooperation throughout my thesis work.

I am also thankful to Mr. Aslahuddin, Mr. Hai, Mr. Gautam, Mr. Faisal, Mr. Nasir, Mrs. Huma, Mr. Ashfaq and all the staff members of the clinical laboratory who always provided me their technical help. I also extend my thanks to Raju Bhai, Gaurav bhai and Jumman Bhai for helping me with a clean and hygienic environment required for experimental work.

Due thanks are expressed to University Grants Commission for providing financial support during this research in the form of scholarship and contingency funds. Lastly, I would like to pay my heartiest homage to Late Sir Syed Ahmad Khan, founder of this great university.

(SHAZIA AMAN)
