Acknowledgement

At the beginning of my doctoral research, I could barely foresee how much I was to mature and gain intellectually in the years to come. A lot many people are responsible for this development; unfortunately, I am able to thank only a few here.

Foremost of them all is my Allah, the Almighty, the lord of all worlds, the most merciful, the most gracious, be witness, I acknowledge your every minute and greatest blessing on me, apparent and hidden favors, from the time before, to the time after this life, in all the quarters, in all the quarters including my research and writing of this Ph.D thesis, just for my belief in you.

I avail this unique opportunity to express my gratitude and indebtedness to my supervisor Dr. Shamsuzzaman. It is not justified if I simply thank him for steering me through the journey that has culminated in this thesis, giving me ample freedom to pursue my topic of interest, patiently reviewing my papers, providing timely and insightful comments and very generously allowing me to attend number of workshops and conferences. I have come to realize that the best way to express my gratitude for the support provided by him and for the role model he has been, is through continued contributions to organic chemistry – I am hopeful of doing so. Thank you Sir. I owe a great debt of gratitude to Prof. M. Mushfiq, Dr. Abdul Rauf, Dr. Mehtab Parveen, Prof. Sartaj Tabassum and Dr. Manzoor A. Gattoo for the invaluable suggestions and guidance during my Ph.D. Thank you all. I am also very thankful to Aftab Husain, Yusuf Khan, Zahid Yaseen, Mahboob Alam, Aamir Sohail, Sheeza Bhat, Imitiaz Bhat, Mehvash Zakia, Suboooh Sherwani, Faisal Mustafa and Irshad Bhat for inviting me for fruitful collaboration and giving me advices from time to time and boost my morale. Needless to say, I look forward to many more such fruitful collaborations. I would also like to thank the anonymous referees of my papers for their constructive comments.

I am highly grateful to Chairman Department of Chemistry, AMU Aligarh for necessary research facilities. I am highly thankful to ICGEB New Delhi, JIIM Jammu, CDFD Hyderabad, Department of Biochemistry AMU Aligarh and Department of Medical Biochemistry JNMC AMU Aligarh for biological studies andUGC for financial support for the successful completion of my research.

As a Ph. D student, I spent most of my time in my lab. I would like to thank my fellow lab mates. Khursheed, Hena, Ashraf, Asif and Abad, you have all been my great friends. I am also thankful to all my other seniors like Dr. Tabassum, Dr. Gulshan Alam, Dr. Sultanat Dr. Rakshanda and Dr. Zoya for
their kind support and cooperation. Besides research activities, I also enjoyed my stay at residential Hostel and this time wouldn’t have been fun, had it not been with people like Faheem, Nadeem, Mohsin, Javid, Jameel, Amin, Rather, Hilal, Rayees and Tariq.

I am at a loss for words to thank my parents for being the best people I know. Had it not been your prayers and patience, I would have been lesser than this. Thank you so much. My sister (Mrs. Irsada) and brother (Mr. Tanveer) has been an ultimate source of moral support. I hope they will enjoy reading this thesis. It is a pleasure to thank many of my closer ones back home M. Ramzan, Fazzia, Parvaiz Ahmad, Maheen, Adeeha, Shahid, Tawfeeqa, Rozey, Ajmal, Asmat, Muskaan, Urooj, Raheela, Saima, Aamir, Mamma Q, Pyare G, Khala G, M. Iusaq Rather, Uncle, M. Yasuf, Sartaj, Summi, Gohar, Mubarak Ahmad, Shubi, Ashraf and Aante G whom I miss every time. Again, since there are too many of them, I am sorry at my inability to provide names here. My sincere apologies are to those whose names have been left out due to constraints on time and memory.

I am indeed thankful to Urfiti Ihsrat for their constant encouragement, emotional support and valuable suggestions.

“C mankind; we created you from a male and female and made you into nations and tribes that you may know and honour each other (not that you despise one another).

Indeed the most honorable of you in the sight of God is the most righteous”

Al-Quran

Ayaz Mahmood Dar
