ACKNOWLEDGEMENTS

I express my deep sense of gratitude to Dr. A. R. Khuda-Bukhsh, Reader, Department of Zoology, University of Kalyani for suggesting the problem, guiding the work and for his unstinted help in compilation of this thesis.

I am grateful to Prof. G. K. Manna, A. K. Bose and A. K. Saha of this department for their encouragements.

I am thankful to the Department of Environment, New Delhi and University of Kalyani for granting me the research fellowship and am also thankful to the Head of the Department of Zoology for providing me with necessary laboratory facilities for conducting my research work.

I appreciate the encouragement and co-operation extended by Dr.(Mrs.) A. Khuda-Bukhsh, Dr. A. Kaviraj, Dr.(Miss) C. Dutta and Dr. M. K. Saha during the tenure of this work.

I wish to place on record the co-operation and affection received from the teachers of this department and laboratory colleagues, Dr. M. R. K. Rao, Dr. A. Barat, Dr.(Miss) P. Sahoo, Dr. K. Nayak, Mr. S. Mady, Dr. B. Padhi, Mr. T. Chanda, Dr. I. Kar, Mr. G. Basu, Mr. A. Saha, Miss. S. Banik, Miss. S. Chakraborty, Mr. B. Acharya, Mr. P. K. Sarkar and sincerely thank my other friends and well-wishers, particularly Mr. R. Banerjee, Mr. M. Kumar, Mr. A. T. Khan, Mr. N. Saha and Mr. K. M Narayan for their encouragement.

My respectful regards are also due to Mr. F. Hague, who inspired me to complete this work.

I am greatly indebted to Dr. T. K. Sen of ZSI, Calcutta, for his kind help in identifying some of the specimens, to the officer-in-charge and staff of Central Estuarine Fisheries Unit at Kakdwip, South 24 Parganas, to the Forest officer of Jayanti hill, Jalpauguri and many fisherman for their help and co-operation during the collection of the fish specimens.

Furthermore, I recall with deep appreciation the guidance, encouragement and devotion of my family who had to endure many domestic problems with patience throughout the tenure of the work.

Finally, I sincerely thank Mr. & Mrs. M. K. Chaudhuri and J. Bhattacharyya for the meticulous care taken in Computer Printing of this thesis.

[ANISUR RAHMAN]
A STUDY OF SOMATIC CHROMOSOMES AND GENOTOXIC POTENTIALITIES OF CERTAIN INDUSTRIAL EFFLUENTS AND CHEMICAL POLLUTANTS IN SOME TELEOSTEAN FISHES.

Anisur Rahman, M.Sc.
Department of Zoology,
University of Kalyani,
Kalyani - 741 235,
West Bengal, India.

The thesis entitled "A study of somatic chromosomes and genotoxic potentialities of certain industrial effluents and chemical pollutants in some teleostean fishes" has been presented in the following two chapters:

Chapter I. A study of somatic chromosomes in twentyone species of teleostean fishes.

Chapter II. A note on the genotoxic potentialities of some industrial effluents and chemical pollutants as revealed by the micronucleus test (MNT) in the peripheral erythrocytes of fish model.
