ACKNOWLEDGEMENT

I express my deep sense of gratitude to Dr. P.K. Sengupta, Reader in Chemistry, University of Kalyani, for suggesting problem, valuable guidance and keen interest throughout the work.

As facilities for infra red spectroscopy, N.M.R. spectroscopy, mass spectroscopy and elemental analyses were not available in our laboratory I had to depend on the generous cooperation of the other laboratories for these facilities. I am grateful to Professor A. Chatterjee, Jadavpur University, Calcutta, for recording the infra red spectra and element analyses. I am also grateful to Dr. R.V. Venkateswaran, Indian Association for the Cultivation of Science, Calcutta and Dr. K.P. Dhara, Calcutta University for recording N.M.R. spectra. Thanks are also due to Dr. B. Acharya of Indian Institute of Chemical Biology, Calcutta, for recording mass spectra.

I am indebted to the Head, Department of Chemistry, University of Kalyani for providing laboratory facilities.

I also intend to record my fathomless thanks to Sri Jyoti Brata Roy, Chemistry Department, Nabawip Vidyasagar
College, Nabadwip and Dr. S. Nath, Orthopharma, Kalyani, for their co-operation during the preparation of my thesis.

I acknowledge my gratefulness to the University of Kalyani for the award of a Research Fellowship.

Department of Chemistry, University of Kalyani, Kalyani.
Date: January 21, 1966.
