Dinosaurs (from the Greek 'terrible lizards') weren't lizards, but they were cold blooded reptiles that lived on Earth 225 to 65 million years ago. Some were plant eaters, while others were flesh eaters. Some were up to 27 metres long and would have been able to look over a three story building. Some weighed 85 tons or 10 times the weight of an elephant. Others were less than a metre long.

The bones and footprints of dead animals were covered with mud millions of years ago. Under the pressure of layers of earth, these eventually turned to hard rock. Today scientists find very old bones, footprints and shells in this rock that help them to picture what life was like millions of years ago. These preserved bones and prints are called fossils. The dinosaurs lived on the Earth when it was warm and humid.

Some dinosaurs, like Tyrannosaurus Rex, were fast moving land dwellers, while others, like slow-moving Brontosaurus, spent most of the day in lakes.

Here are some properties of five of the most famous dinosaurs.

Pre-Intervention Assessment

Task 1(A)

Read the passage about the Arctic. Then fill in the web diagram with the facts from the passage. **YOU MAY ALSO USE ANY OTHER TYPE OF DIAGRAM TO PRESENT THE INFORMATION.**

The Arctic is a large region of the earth around the North Pole. This region includes the Arctic Ocean, Greenland, Iceland, thousands of smaller islands, and the northern parts of three continents: North America, Europe, and Asia. Many of the inhabitants are Eskimos, people native to the region. Still others are Lapps, Yakuts, and Chukchi.

Wildlife in the Arctic includes wolves, polar bears, foxes, many birds, caribou, lemmings, voles, walrus, and arctic hares. The most common Arctic fish is the char. The Arctic climate is harsh. Temperatures can reach 70 degrees below freezing in the winter. Violent winds make the weather even bitter.

When his mother asked him what happened, Sanjay did not reply. Sanjay's sister said, "some animal in the park must have bitten him."

Now, answer the following question using the information given above.

Do you think the conclusion drawn by Sanjay's sister right? Explain why/why not? You need to support your answer with reasons.

Task 3(A)

Directions: Study the following information about two models of mobile phones. Answer the questions that follow.

Recently, your parents wanted to give a mobile phone as a gift to you. You went to a showroom to buy a mobile phone. The salesman in the showroom showed the following mobile sets to you.

Nokia

Samsung

The salesman in the mobile phone showroom gave the following information that is available in the catalogues of these phones.

Nokia’s model number is K1662 whereas Samsung’s model number is S3122. Both the phones do not have in-built camera. Nokia is a very popular brand and it can hold 1,000 addresses whereas only 900 addresses can be stored in Samsung. There is vibration facility in the above phones. Nokia does not have loud speaker but Samsung has this facility. There is no music player in both the phones but FM radio is available in them. In Nokia, there is a special feature called ‘T9’ dictionary with which you can type messages very quickly but in Samsung this feature is not available. Samsung offers a feature through which you can use languages other than English: 7 African languages along with Hindi. But you can use only English language to operate Nokia. The display sizes are as follows: Nokia—1.8 inches; Samsung—1.6 inches. Bluetooth and video options are not available in these phones. Calendar and calculator features are there in both the phones.

You talked to a few people who used these two phones. They gave the following information.

Ramesh: I used Nokia for two years. Nokia phones are wonderful phones and they look good. This model (K1662) is now a bit old-fashioned so I sold it and I bought a new phone.
Vishnu: I bought Samsung (S3122) 3 years ago. I like the clarity of the display but its battery is very weak and goes down very quickly. I wanted to sell it but they did not offer me a good price. So, I am still using it now.

Ramya: Nokia is heavy (in weight). It looks like a lorry. But I like Nokia's speaker. It is very loud. It fell down so many times but nothing broke. I bought it 3 years ago. My dad's phone is Samsung. He likes it so much.

Now, write a response explaining which phone you would prefer to buy. YOU SHOULD GIVE REASONS IN DETAIL FOR YOUR CHOICE. Use all the information provided.

Task 3(B)

Answer the following questions

1. What was really hard/easy/interesting in Task 3(A)?

2. To what extent you are successful in accomplishing Task 3(A)?
Task 4 (A)

(i) Read the following and answer the questions.

Rahul's parents have asked him to buy a kilo of rice and \( \frac{3}{4} \) a kilo of meat from the market. After buying meat from the Chicken centre, Rahul went to a merchant and asked for rice. The merchant quoted Rs. 43 for a kilo. Three days ago Rahul went to the same merchant and bought a kilo of rice for Rs. 39. Rahul paid the money and brought both the items home.

If you were Rahul, would you buy rice? Why/why not? Write a response explaining what you would do in such case.

(ii) Read the following and answer the questions.

Vishal, his sister and his mother have just watched a Hindi movie in which the lead role was played by Shahrukh Khan. After watching the movie, Vishal said that Shahrukh Khan is the most handsome man and so he likes him. But his sister disagreed with him and said that she likes Salman Khan because he is the most handsome man. His mother started arguing that these two actors are not so handsome as Aamir Khan and therefore she said that Aamir Khan is the best.

In your opinion who is right—Vishal, his sister, or his brother? Why/why not? Write a response giving reasons for your choice.

Task 1

Read the following article, and fill in the table and diagrams that follow.

African and Asian Elephants

Take a close look at the pictures of the African and the Asian elephants. How are the elephants alike? How are they different? African and Asian elephants look very similar. Both are very large animals. In fact, these enormous beasts are the biggest land animals on Earth. However, if you look at the picture, you can see that African elephants are bigger than Asia elephants. African elephants weigh up to 14,000 pounds or more and are about 12 feet high at the shoulder. Asian elephants weigh up to 12,000 pounds and are about 9 feet high at the shoulder. African elephants also have bigger ears.

Why do you think African elephants have bigger ears? African elephants are found mostly on the plains. It’s hot on the plains. African elephants use their large ears to cool off. Asian elephants live mostly in the forests where it is cooler.

Asian elephants have more toes. An Asian elephant has five toes on the front foot. An African elephant has only four. An African elephant has two fingers at the tip of its trunk. An Asian elephant has just one. Both male and female African
Elephants have tusks, but only male Asian elephants have tusks. Asian elephants have two bumps on their forehead. African elephants have none.

**Task 2**
Dugongs and Manatees

Dugongs

Have you heard of an animal called a dugong? Dugongs are large sea animals. They can grow to be 10 feet (3 meters) long and weigh up to 900 pounds (408 kilograms). Dugongs like to live in warm, shallow water where sea grasses grow. They use their front flippers to push themselves through the water. Dugongs are sometimes known as “sea cows.” Like cows, they spend much of their time eating grass. But the grass they eat is under the sea. Dugongs are mammals. This means that they need to breathe air. They can stay under water for only a few minutes. Dugongs have poor eyesight but keen hearing. They find grasses with their whiskers. Whiskers cover their upper lip and their large snout. The whiskers are feelers that tell the dugongs what it is touching. Dugongs take a long time to grow up. Some animals are full grown a few months after they are born. But dugongs take sixteen or more years before they are ready to have babies. But that’s okay. Dugongs live for seventy years or more. They are one of the longest-living mammals on Earth. They live just about as long as people do.

Manatees

Manatees are cousins to dugongs and are also large sea creatures. And they are also animals. Manatees can be 12 feet (3.7 meters) long and weigh 1,500 pounds (680 kilograms) or more. Like dugongs, they are known as sea cows and eat sea plants. They also live in warm, shallow water and feed on the plants that grow at the bottom of streams, rivers, and canals. They use their front flippers to push themselves along the bottom of the waterway. Manatees eat a lot. They eat up to 100 pounds (45 kilograms) of plants a day. Manatees have good hearing and good
eyesight. Manatees grow up a little faster than dugongs and don’t live quite as long. They live for only about sixty years.

Fill in the boxes in the frame matrix with information from the article.

**Metacognition (M1)**

**TASK 1**

Read the following passage and fill the chart that follows.

**AADHAR CARD**

Aadhaar is a unique Identification number issued by UIDAI to individuals for the purpose of establishing unique identification of every single person. Aadhaar is actually a 12-digit number and not a card which is unique for every individual who enroll or apply to get his/her Aadhaar number. The Unique Identification Authority of India (UIDAI) is the regulatory body for this.

Aadhaar is meant for individuals of any age (including children) for the purpose of establishing identities. Since Aadhaar is for only individuals, it is different for all the members of a family. For deciding uniqueness of every individual, the demographic details (residence address information) of the person and his/her biometric information (photograph, iris-scan, fingerprints) is collected which is stored in a centralized database.

Aadhaar is not a compulsory approach instead, it is voluntary based and any individual who is interested in having Aadhaar number for himself/herself can enrol or apply to get Aadhaar number. An individual will be provided with only one unique Aadhaar number and not multiple unique ID numbers. Aadhaar number will be valid for the whole life of any individual and does not need to be changed or renewed from time-to-time. A person can get his/her Aadhaar number for free of cost.

The Aadhaar number can be used while opening a bank account, applying for passport, booking e-tickets and many other places where there is a need to give your identity. Aadhaar number will be your identity which will provide you with the simplest way of describing who you are?

Snakes

There are around 3000 snake species in the world, and about 375 of these are venomous. Anaconda can grow up to 38 feet in length, the brahminy blind snake is just 2 inches long, making it the smallest snake. The paradise tree-snake of South-east Asia can 'fly' through the air by flattening its body into an s-shaped ribbon. Snakes have more than 200 teeth, which they do not use to chew, since they point backwards, but bite and grip their prey securely. Most toxic snake of all is the Inland Taipan of Australia. It could kill 100 people with a single bite. Snakes have no eyelids. Instead of eyelids, snakes have a transparent scale protecting their eye. Snakes are found on every continent of the world except Antarctica. They also do not have ears. They are totally deaf. However, they get to 'hear' from the vibrations on the ground. Snakes smell with their tongue. Many people believe that the snakes do not have bones. They have. They also have organs like the heart, the lungs and the kidneys. They also have the blood. The snakes also possess the brain. Snakes cannot move very fast. The fastest speed recorded is 13 Km/hr. Most of the snakes are much slower than this and an adult human being can easily outrun any snake. The longest recorded life span for a snake is 30 years. This has been seen in the case of anacondas.

Metacognition (M2)

Task 1
Write your metacognitive experiences of the task performance after doing the following.

**Frogs and toads**

*Read the article and answer the questions that follow it.*

Frogs and toads seem to be identical until you take a closer look. Both frogs and toads have big protruding eyes, long tongues, and strong back legs. With their long tongues, they can catch plenty of insects. With their strong back legs, they can hop on land or swim through the water. Both frogs and toads grow up in the water. However, toads are usually darker than frogs. Frogs have smooth, moist skin. Toads have dry, rough skin that is full of small bumps known as warts. But both frogs and toads have a poison on their skins that helps keep enemies away. Most toads live in fields or near the water, but most frogs live in or near the water.

Fill in the boxes given below with information from the article and then present the information from the passage in the graphic organizer (two egg-shaped circles) given below.

Task 4 (See Lesson 6)

Read the following paragraphs on bananas and pineapples. Present the information in the graphic organizer given.

**Bananas**

Bananas are a yellow fruit that grows in hot climates. Sometimes it is called the “perfect fruit” because you don’t have to wash it and it is easy to carry. Bananas are good for muscles. For a delicious treat, add some banana slices to other foods, like cereal, ice cream, or a peanut butter sandwich. A banana is also an excellent breakfast food.

**Pineapples**

Pineapples are another example of a yellow fruit that grows in hot climates. Pineapples are very juicy and sweet. They taste wonderful when added to other foods, like pizza, ice cream, or cakes. Pineapples are not very easy to carry around because they are large and have prickly skin. Since you don’t eat the outer skin of a pineapple, you don’t have to wash it before you eat it.

Appendix 5

Post-Intervention Assessment

Task 1 (A)

Read the passage about the Antarctica. Then fill in the web diagram with the facts from the passage. **You may also use any other type of diagram to present the information.**

Antarctica is the continent at the South Pole. Antarctica is surrounded by three oceans—the Atlantic, Pacific, and Indian. It is the fifth largest continent and the coldest place on Earth. Because it is below the equator, winter in Antarctica takes place when it is summer in the United States. Metal shatters like glass in the brutal Antarctic winter. Temperatures drop to 120 below zero; a person without the right clothing would freeze solid in just a few minutes. Winds gusting up to 200 miles per hour come screaming down the ice, tearing into the piles of snow. With the exception of a few insects, Antarctica has no animal life on its land. However, penguins, seals, whales, krill, and seabirds thrive in the oceans around the continent. Likewise, few plants besides mosses grow on the ice-covered land of Antarctica. No people live permanently on this continent, but Antarctica is known for its scientific stations. Many nations, including the U.S., Chile, Norway, Great Britain, and Australia have large research centers where scientists study earthquakes, gravity, oceans, and weather conditions.

Recently, your parents wanted to buy a television set. You and your parents went to a showroom to buy a TV. The salesman in the showroom showed the following television sets to you.

Weston TV

Bush TV

The salesman in the TV showroom gave the following information that is available in the catalogues of these TV sets.

Weston TV is made in Mumbai but Bush TV is made in Chennai. Weston TV's model number is W71718. Bush TV's model number is B57480. The size of Weston TV is 21 inches and the size of Bush TV is also 21 inches. Weston TV's weight is 2 kg but Bush TV's weight is 2 1/2 kg. The price of Weston TV is Rs. 16,000/- whereas Bush TV price is Rs. 14,000/-. We can watch 120 channels on Weston TV but 110 channels on Bush TV. Weston TV is brown in colour whereas Bush TV is in black in colour. Both the TV sets have flat screen. Both the screens are TFT screens. The base of the Weston TV is made of plastic but the base of Bush TV is made of iron. Both the TV's have remote controls. The size of the Weston TV's remote control is 8 inches but Bush TV's remote control is 10 inches. Weston TV has a guarantee of 2 years but Bush TV has only a guarantee of 1 1/2 years. In Weston TV, there is a facility of storing the live programmes but this facility is not there in Bush TV. Bush TV has a free gift offer. The free gift is TV stand, which is worth of Rs. 800/-. But Weston TV does not have any free gift.
You talked to your friends who used these two TV sets. They gave the following information.

Kamala: I have Bush TV. Bush TV is a wonderful TV set and it looks very good. The price of Bush TV is less than Weston TV. I like Bush TV because it is made in Chennai. Also, Bush TV is cheaper than Weston TV. Bush TV is very strong. It does not break easily. So, I bought Bush TV.

James: I bought Weston TV 3 years ago. I like the clarity of the display. Weston TV is always better than Bush TV because Weston TV is less in weight. I like a TV with less weight. I like brown colour. Brown colour looks better than black colour.

Rehman: I bought Weston TV because I watch more number of channels. Because its base is plastic it does not rust. It does not get damaged. Plastic is less in weight but iron is more in weight. That is why I bought Weston TV. Moreover, it has a guarantee of 2 years.

Now, write a response explaining which television set you would prefer to buy. You should give reasons in detail for your choice. Use all the information provided.
