ACKNOWLEDGEMENTS

First of all, I will thank almighty GOD to put up me to this level to pursue Ph.D. My heartfelt thanks to our Chancellor, Dr. G. Viswanathan, President and Chancellor, VIT University for impressing upon me the need for standards of excellence in education and research. I also express my gratitude to Mr. G. V. Selvam, Vice-presidents of VIT University for their strong moral support. I also thank Dr. Anand A. Samuel, Vice-Chancellor of VIT University for their excellent motivation. I am also very grateful to Dr. Elizabeth Rufus, Professor and Dean, SENSE, for her continuous support and encouragement during my research work.

I would like to express my sincere gratitude to my guide Dr. E. R. Rajkumar for his support and guidance for the completion of this work. I would like to extend my thanks to the committee members of this thesis Dr. Kumar Rajamani, Manager (Technical) at Robert Bosch Engineering and Business Solutions Ltd, Bangalore, Dr. N. Sivakumaran, Associate Professor, NIT Tiruchirappalli and internal DC Member Dr. Arulmozhivarman P., Professor and Dean, SELECT for their valuable suggestions and encouragement. A special thanks to Dr. Megha Singh for his guidance.

My heartfelt thanks to Dr. Thirumal Babu, HOD of Cardiology Government Medical College, Vellore / Heart Line Clinic, Thennamara Street, Vellore for teaching me the acquisition of echocardiography data interpretations and Dr. Olivier Bernard, Creatis Laboratory, University of Lyon, France for providing 3D Echocardiography data and their clinical information.

I thank all other faculties and staff of SENSE and SBST for their timely help during my research work. My gratitude also goes to all my colleagues for their support, friendship and useful discussions. Last but not the least, I thank my family members for their prayers and support.

Place : Vellore
Date : 06. 03. 2018

Rani Chacko
TABLE OF CONTENTS

ABSTRACT i
ACKNOWLEDGEMENTS iii
LIST OF FIGURES vi
LIST OF TABLES ix
LIST OF ABBREVIATIONS x
CHAPTER 1 INTRODUCTION 1
  1.1 Cardiology 1
    1.1.1 Anatomy of the Heart 2
    1.1.2 Region of Interest: Left Ventricle 3
    1.1.3 Measuring Cardiac Function 5
    1.1.4 Echocardiography: Principle, Acquisition and Display 6
    1.1.5 Ultrasound Interaction with Tissue 12
    1.1.6 Transthoracic Echocardiogram (TTE) 14
  1.2 Challenges 18
  1.3 Motivation and objectives 20
  1.4 Outline of the Thesis 21
CHAPTER 2 LITERATURE REVIEW 22
  2.1 Overview of Segmentation Approaches in 2DE 25
    2.1.1 Active Contour Segmentation Methods 25
    2.1.2. Active Shape and Active Appearance Models 26
    2.1.3. Level Set Segmentation Methods 27
    2.1.4. Deformable Templates 28
    2.1.5. Bottom-Up Segmentation 30
    2.1.6. Database Guided Segmentation 30
    2.1.7. Other Approaches 30
  2.2. Overview of Segmentation Approaches in 3DE 31
    2.2.1 Deformable Models 34
    2.2.2. Graph Cut Model 38
    2.2.3. Statistical Models 39
    2.2.4. Machine Learning from Large Databases 40
    2.2.5. Various other Segmentation Techniques 42
  2.3. Conclusion Drawn from Literature 47
CHAPTER 3  METHODOLOGY

3.1. Two Dimensional Echocardiography
   3.1.1. Flow Chart of the Proposed Semi-Automatic Method
   3.1.2. Steps Involved in the Method
   3.1.3. Calculation of Shape Descriptors
   3.1.4. Calculation of Clinical Indices

3.2. Three Dimensional Echocardiography
   3.2.1. Flowchart of the Automatic Method
   3.2.2. Steps Involved in the Procedure
      3.2.2.1. Histogram Equalization
      3.2.2.2. Adaptive Thresholding
      3.2.2.3. Voxel Connectivity Based Noise Filtering
      3.2.2.4. Segmentation of LV

CHAPTER 4  RESULTS AND DISCUSSION

4.1. Results of LV Segmentation in 2DE Data
   4.1.1. Summary

4.2. Results of Noise Filtering in 3DE Data
   4.2.1. Performance Analysis of Noise Filtering in 3DE Data
      4.2.1.1. Pratt’s Figure of Merit
      4.2.1.2. Contrast
      4.2.1.3. Summary

4.3. Results for Segmentation of LV in 3DE
   4.3.1. Validation Work
   4.3.2. Summary

CHAPTER 5  CONCLUSIONS AND FUTURE SCOPE

5.1. Conclusion

5.2. Future Scope
