Srimati Sulekha Mukherjee, M.Sc., who was a Junior UGC Research Fellow in the Department of Mathematics, University of Kalyani and who was later offered a Senior UGC Research Fellowship started the work of her Ph.D. thesis entitled "On some iterative methods in certain abstract spaces" under my supervision during my tenure in the Kalyani University. She has now fulfilled the conditions required for submission of the thesis to the University of Kalyani and has duly recognised the assistance she has received during the course of this investigation.

In my opinion, the thesis is worthy of consideration for a doctorate degree (Ph.D.) of the University of Kalyani.
