CONTENTS

INTRODUCTION 1

OBJECTIVES OF THE PRESENT STUDY 7

LITERATURE REVIEW 9
  Impact of hypoxia 9
  Hypoxia and neuronal death 11
  Hypoxia and medications 12
  Neonatal resuscitation during hypoxia 14
  Free radical release and toxicity 18
  Hormonal changes during hypoxia 19
  Second messenger changes during hypoxia 21
  Inositol 1,4,5- trisphosphate 22
  Cyclic guanosine monophosphate 23
  Cyclic adenosine monophosphate 24
  Transcription factor changes during hypoxia 25
  Hypoxia inducible factor (HIF) 25
  Cyclic AMP response element binding protein (CREB) 26
  Neurotransmitter receptors and their role in hypoxia 27
  Adrenergic receptors 28
  Glutamate receptors 29
  GABA receptors 30
  GABA_A receptor 32
  GABA_B receptor 33
  GABA_C receptor 34
  Glutamic acid decarboxylase 34
Adenosine receptors 35
Serotonin receptors 36
5-HT$_{2A}$ receptors 38
Acetyl choline receptors 38
Muscarinic receptors 39
Muscarinic M1 receptors 40
Muscarinic M2 receptors 41
Muscarinic M3 receptors 42
Muscarinic M4 receptors 42
Muscarinic M5 receptors 42
Developmental changes due to hypoxia 43
Role of glucose in regulating energy demand 44
Role of ATP in regulating energy demand 45
Effect of hyper oxygenation 46
Behavioural changes associated with hypoxia 49
Brain wave activity and seizures as a result of hypoxia 51

MATERIALS AND METHODS 55

Chemicals Used And Their Sources 55
Biochemicals 55
Radiochemicals 55
Molecular Biology Chemicals 56
Confocal Dyes 56
Animals 56
Induction of acute hypoxia in neonatal rats 57
Tissue preparation 57
Estimation of blood Glucose 57

</table>
Immunohistochemistry of GABA$_{A_{1}}$ receptor, serotonin receptor subtype 5-HT$_{2A}$, serotonin transporter 5-HTT in the brain regions of control and experimental neonatal rats using confocal microscope.

IP3 content in the brain regions of control and experimental rats \textit{in vivo}.

- Principle of the assay
- Assay protocol

cGMP content in the brain regions of control and experimental rats \textit{in vivo}.

- Principle of the assay
- Assay protocol

cAMP content in the brain regions of control and experimental rats \textit{in vivo}.

- Principle of the assay
- Assay protocol

Behavioural Studies

- Wire maneuver test
- Righting reflex
- Y-maze test
- Radial arm maze test
- Morris water maze test

Statistics

RESULTS

Body weight and blood glucose level

Superoxide dismutase (SOD) activity in heart of control and experimental neonatal rats
Superoxide dismutase (SOD) activity in cerebral cortex of control and experimental neonatal rats 78
Catalase (CAT) activity in heart of control and experimental neonatal rats 79
Catalase activity in cerebral cortex of control and experimental neonatal rats 79
Triiodothyronine (T3) content in the heart of control and experimental neonatal rats 80
Triiodothyronine (T3) concentration in the serum of control and experimental neonatal rats 80
Circulating insulin level in the plasma of control and experimental neonatal rats 80
Insulin receptor gene expression in the heart of control and experimental neonatal rats 81
Triiodothyronine (T3) receptor function in the heart of control and experimental neonatal rats 81
GABA content (µmoles/g wet wt.) in the brain regions of control and experimental neonatal rats 81
Serotonin and its metabolite content (nmoles/g wet wt.) in the cerebellum of control and experimental neonatal rats 82
Serotonin and its metabolite content (nmoles/g wet wt.) in the brain stem of control and experimental neonatal rats 82
Neurotransmitters, HIF1A, superoxide dismutase, glutathione Peroxidase, Bax, CREB and phospholipase C expression in the brain regions of experimental neonatal rats 83
CEREBRAL CORTEX

Total GABA receptor analysis 83

Scatchard analysis of $[^3]$H GABA binding against GABA to total GABA receptor in the cerebral cortex of control and experimental neonatal rats 83

Displacement analysis of GABA in the cerebral cortex 83

GABA$_A$ receptor analysis 84

Scatchard analysis of $[^3]$H bicuculline binding against bicuculline to GABA$_A$ receptor in the cerebral cortex of control and experimental neonatal rats 84

GABA$_B$ receptor analysis 84

Scatchard analysis of $[^3]$H baclofen binding against baclofen to GABA$_B$ receptor in the cerebral cortex of control and experimental neonatal rats 84

Real time PCR analysis of GABA$_A$, GABA$_B$ receptor subtypes and GAD 85

Real time PCR analysis of GABA$_A$ receptor subtype mRNA 85

Real time PCR analysis of GABA$_B$ receptor subtype mRNA 85

Real time PCR analysis of GAD mRNA 85

Confocal studies of GABA$_{A1}$ receptor antibody staining 86

GABA$_{A1}$ receptor antibody staining in the cerebral cortex of control and experimental neonatal rats 86

Total 5-HT receptor analysis 86

Scatchard analysis of $[^3]$H 5-HT binding against 5-HT to total 5-HT receptor in the cerebral cortex of control and experimental neonatal rats 86
5-HT$_{2A}$ receptor analysis

Scatchard analysis of $[^3]$H ketanserin binding against Ketanserin to 5-HT$_{2A}$ receptor in the cerebral cortex of control and experimental neonatal rats

Real time PCR analysis of 5-HT$_{2A}$ receptor subtypes and 5-HTT

Real time PCR analysis of 5-HT$_{2A}$ receptor subtypes mRNA

Real time PCR analysis of 5-HTT mRNA

Confocal studies of 5-HT$_{2A}$ receptor and 5-HTT antibody staining

5-HT$_{2A}$ receptor antibody staining in the cerebral cortex of control and experimental neonatal rats

5-HTT antibody staining in the cerebral cortex of control and experimental neonatal rats

Total muscarinic receptor analysis

Scatchard analysis of $[^3]$H QNB binding against atropine to total muscarinic receptor in the cerebral cortex of control and experimental rats

Real Time-PCR Analysis in the cerebral cortex

Real Time-PCR analysis of muscarinic M1 receptor mRNA

Real Time-PCR analysis of muscarinic M2 receptor mRNA

Real Time-PCR analysis of muscarinic M3 receptor mRNA
Real Time-PCR analysis of choline acetyltransferase mRNA  
Real Time-PCR analysis of acetylcholine esterase in mRNA  
Real Time-PCR analysis of HIF 1 mRNA  
Real Time-PCR analysis of SOD mRNA  
Real Time-PCR analysis of GPx mRNA  
Real Time-PCR analysis of Bax mRNA  
Real Time-PCR analysis of CREB mRNA  
Real Time-PCR analysis of phospholipase C mRNA

CEREBELLUM

Total GABA receptor analysis  
Scatchard analysis of [^3]H GABA binding against GABA to total GABA receptor in the cerebellum of control and experimental neonatal rats  
Displacement analysis of GABA in the cerebellum  
GABA_A receptor analysis  
Scatchard analysis of [^3]H bicuculline binding against bicuculline to GABA_A receptor in the cerebellum of control and experimental neonatal rats  
GABA_B receptor analysis  
Scatchard analysis of [^3]H baclofen binding against baclofen to GABA_B receptor in the cerebellum of control and experimental neonatal rats  
Real time PCR analysis of GABA_A, GABA_B receptor subtypes and GAD
Real time PCR analysis of GABA\textsubscript{A} receptor subtype mRNA 94

Real time PCR analysis of GABA\textsubscript{B} receptor subtype mRNA 94

Real time PCR analysis of GAD mRNA 95

Confocal studies of GABA\textsubscript{A\alpha 1} receptor antibody staining 95

GABA\textsubscript{A\alpha 1} receptor antibody staining in the cerebellum of control and experimental neonatal rats 95

Total 5-HT receptor analysis 95

Scatchard analysis of [\textsuperscript{3}H] 5-HT binding against 5-HT to total 5-HT receptor in the cerebellum of control and experimental neonatal rats 95

5-HT\textsubscript{2A} receptor analysis 96

Scatchard analysis of [\textsuperscript{3}H] ketanserin binding against Ketanserin to 5-HT\textsubscript{2A} receptor in the cerebellum of control and experimental neonatal rats 96

Real time PCR analysis of 5-HT\textsubscript{2A} receptor subtypes and 5-HTT 96

Real time PCR analysis of 5-HT\textsubscript{2A} receptor subtypes mRNA 96

Real time PCR analysis of 5-HTT mRNA 97

Confocal studies of 5-HT\textsubscript{2A} receptor and 5-HTT antibody staining 97

5-HT\textsubscript{2A} receptor antibody staining in the cerebellum of control and experimental neonatal rats 97

5-HTT antibody staining in the cerebellum of control and experimental neonatal rats 97
Total muscarinic receptor analysis

Scatchard analysis of $[^3]H$ QNB binding against atropine to total muscarinic receptor in the cerebellum of control and experimental rats

Real Time-PCR Analysis in the cerebellum

Real Time-PCR analysis of muscarinic M1 receptor mRNA

Real Time-PCR analysis of muscarinic M2 receptor mRNA

Real Time-PCR analysis of muscarinic M3 receptor mRNA

Real Time-PCR analysis of acetylcholine esterase in mRNA

Real Time-PCR analysis of choline acetyltransferase mRNA

Real Time-PCR analysis of HIF 1 mRNA

Real Time-PCR analysis of SOD mRNA

Real Time-PCR analysis of GPx mRNA

Real Time-PCR analysis of Bax mRNA

Real Time-PCR analysis of CREB mRNA

Real Time-PCR analysis of phospholipase C mRNA

BRAIN STEM

Total GABA receptor analysis
Scatchard analysis of $[^3\text{H}]$ GABA binding against GABA to total GABA receptor in the brain stem of control and experimental neonatal rats 101

Displacement analysis of GABA in the brain stem 102

GABA$_A$ receptor analysis 102

Scatchard analysis of $[^3\text{H}]$ bicuculline binding against bicuculline to GABA$_A$ receptor in the brain stem of control and experimental neonatal rats 102

GABA$_B$ receptor analysis 103

Scatchard analysis of $[^3\text{H}]$ baclofen binding against baclofen to GABA$_B$ receptor in the brain stem of control and experimental neonatal rats 103

Real time PCR analysis of GABA$_A$, GABA$_B$ receptor subtypes and GAD 103

Real time PCR analysis of GABA$_A$ receptor subtype mRNA 103

Real time PCR analysis of GABA$_B$ receptor subtype mRNA 104

Real time PCR analysis of GAD mRNA 104

Confocal studies of GABA$_A_{\alpha 1}$ receptor antibody staining 104

GABA$_A_{\alpha 1}$ receptor antibody staining in the brain stem of control and experimental neonatal rats 104

Total 5-HT receptor analysis 105

Scatchard analysis of $[^3\text{H}]$ 5-HT binding against 5-HT to total 5-HT receptor in the brain stem of control and experimental neonatal rats 105

5-HT$_{2A}$ receptor analysis 105
Scatchard analysis of $[^3]H$ ketanserin binding against Ketanserin to 5-HT$_{2A}$ receptor in the brain stem of control and experimental neonatal rats 105

Real time PCR analysis of 5-HT$_{2A}$ receptor subtypes and 5-HT 105

Real time PCR analysis of 5-HT$_{2A}$ receptor subtypes mRNA 105

Real time PCR analysis of 5-HTT mRNA 106

Confocal studies of 5-HT$_{2A}$ receptor and 5-HTT antibody staining 106

5-HT$_{2A}$ receptor antibody staining in the brain stem of control and experimental neonatal rats 106

5-HTT antibody staining in the brain stem of control and experimental neonatal rats 106

Total muscarinic receptor analysis 107

Scatchard analysis of $[^3]H$ QNB binding against atropine to total muscarinic receptor in the brain stem of control and experimental rats 107

Real Time-PCR Analysis in the brain stem 107

Real Time-PCR analysis of muscarinic M1 receptor mRNA 107

Real Time-PCR analysis of muscarinic M2 receptor mRNA 108

Real Time-PCR analysis of muscarinic M3 receptor mRNA 108

Real Time-PCR analysis of acetylcholine esterase in mRNA 108
Real Time-PCR analysis of choline acetyltransferase mRNA 109
Real Time-PCR analysis of HIF 1 mRNA 109
Real Time-PCR analysis of SOD mRNA 109
Real Time-PCR analysis of GPx mRNA 109
Real Time-PCR analysis of Bax mRNA 110
Real Time-PCR analysis of CREB mRNA 110
Real Time-PCR analysis of phospholipase C mRNA 110

CORPUS STRIATUM 111

Total GABA receptor analysis 111
Scatchard analysis of [$^3$H] GABA binding against GABA to total GABA receptor in the corpus striatum of control and experimental neonatal rats 111
Displacement analysis of GABA in the corpus striatum 111
GABA$_A$ receptor analysis 111
Scatchard analysis of [$^3$H] bicuculline binding against bicuculline to GABA$_A$ receptor in the corpus striatum of control and experimental neonatal rats 111
GABA$_B$ receptor analysis 112
Scatchard analysis of [$^3$H] baclofen binding against baclofen to GABA$_B$ receptor in the corpus striatum of control and experimental neonatal rats 112
Real time PCR analysis of GABA$_A$, GABA$_B$ receptor subtypes and GAD 112
Real time PCR analysis of GABA$_A$ receptor subtype
mRNA

Real time PCR analysis of GABA<sub>B</sub> receptor subtype mRNA  112

Real time PCR analysis of GAD mRNA  113

Total 5-HT receptor analysis  113

Scatchard analysis of [³H] 5-HT binding against 5-HT to total 5-HT receptor in the corpus striatum of control and experimental neonatal rats  113

5-HT<sub>2A</sub> receptor analysis  114

Scatchard analysis of [³H] ketanserin binding against Ketanserin to 5-HT<sub>2A</sub> receptor in the corpus striatum of control and experimental neonatal rats  114

Real time PCR analysis of 5-HT<sub>2A</sub> receptor subtypes and 5-HTT  114

Real time PCR analysis of 5-HT<sub>2A</sub> receptor subtypes mRNA  114

Real time PCR analysis of 5-HTT mRNA  114

Total muscarinic receptor analysis  115

Scatchard analysis of [³H] QNB binding against atropine to total muscarinic receptor in the corpus striatum of control and experimental rats  115

Real Time-PCR Analysis in the corpus striatum  115

Real Time-PCR analysis of muscarinic M1 receptor mRNA  115

Real Time-PCR analysis of muscarinic M2 receptor mRNA  115
Real Time-PCR analysis of muscarinic M3 receptor mRNA 116
Real Time-PCR analysis of acetylcholine esterase in mRNA 116
Real Time-PCR analysis of choline acetyltransferase mRNA 116
Real Time-PCR analysis of HIF 1 mRNA 117
Real Time-PCR analysis of SOD mRNA 117
Real Time-PCR analysis of GPx mRNA 117
Real Time-PCR analysis of Bax mRNA 117
Real Time-PCR analysis of CREB mRNA 118
Real Time-PCR analysis of phospholipase C mRNA 118
Second messenger cGMP, cAMP, IP3 content in the corpus Striatum 118
cGMP content in the corpus striatum of experimental groups of neonatal rats 118
cAMP content in the corpus striatum of experimental groups of neonatal rats 119
IP3 content in the corpus striatum of experimental groups of neonatal rats 119
Behavioural studies 119
Body weight of experimental rats used for behavioural studies 119
Y maze test 119
Radial arm maze test 120
Morris water maze test 121
