

List of Tables	Pages
Table 2.1 showing the goodness of fit of the original personality scale and the modified version of the scale after CFA was run	73
Table 2.2 showing the goodness of fit of the original interest scale and the modified version of the scale after CFA was run	74
Table 2.3 showing the goodness of fit of the original work motivation scale and the modified version of the scale after CFA was run	76
Table 2.4 showing the goodness of fit of the original Social Support System scale after CFA was run	77
Table 2.5 showing the goodness of fit of the original work engagement scale after CFA was run	78
Table 2.6 showing the goodness of fit of the original Oxford Happiness scale and the modified version of the scale after CFA was run	79
Table 2.7 showing the goodness of fit of the original Career satisfaction scale after CFA was run	81
Table 2.8 showing the factors, items and factor loadings of the final career networking scale	82
Table 2.9 showing the factors, items and factor loadings of the final career planning scale	84
Table 2.10 showing the factors, items and factor loadings of the final organizational career management scale	85
Table 2.11 showing the factors, items and factor loadings of the socio economic status scale	86

Table 3.1 Descriptive summary table showing mean and standard deviation of (personality, interest, work motivation, social support system, socio economic status and career planning) N=200	94
Table 3.2 Coefficient of correlation between the antecedents (personality, interest, work motivation, social support system, socio economic status) and career planning N=200.	97
Table 3.3 Backward stepwise method regression model of antecedents (personality, interest, work motivation, social support system, socio economic status, gender and work experience) of career planning N=200	99
Table 3.4 Descriptive statistics career planning and networking	102
Table 3.5 Coefficient of correlation between networking and career planning	103
Table 3.6 Descriptive statistics career planning and OCM	104
Table 3.7: Coefficient of correlation between OCM and career planning	105
Table 3.8 depicting parallel multiple mediation: regression coefficients, standard errors, and significance level for the mapping the direct and indirect effect of career planning on the consequences work engagement through the 5 mediators for group 1.	107
Table 3.9 depicting parallel multiple mediation: regression coefficients, standard errors, and significance level for the mapping the direct and indirect effect of career planning on the consequences work engagement through the 5 mediators for group 2.	109
Table 3.10 depicting parallel multiple mediation: regression	111

coefficients, standard errors, and significance level for the mapping the direct and indirect effect of career planning on the consequences happiness through the 5 mediators for group 1.	
Table 3.11 depicting parallel multiple mediation: regression coefficients, standard errors, and significance level for the mapping the direct and indirect effect of career planning on the consequences happiness through the 5 mediators for group 2.	113
Table 3.12 depicting parallel multiple mediation: regression coefficients, standard errors, and significance level for the mapping the direct and indirect effect of career planning on the consequences career satisfaction through the 5 mediators for group 1.	115
Table 3.13 depicting parallel multiple mediation: regression coefficients, standard errors, and significance level for the mapping the direct and indirect effect of career planning on the consequences career satisfaction through the 5 mediators for group 2.	117
Table 3.14 Summary of direct, indirect total and specific effects for the parallel multiple mediation models:	118
Table 3.15 Descriptive Statistics Work Engagement and Career Planning	119
Table 3.16 Coefficient of correlation between work engagement and career planning	120
Table 3.17 Descriptive Statistics Happiness and Career Planning	121
Table 3.18 Coefficient of correlation between happiness and career planning	121

Table 3.19 Descriptive Statistics (Career Planning and Career Satisfaction)	122
Table 3.20 Coefficient of correlation between career satisfaction and career planning	123
