ACKNOWLEDGEMENTS

In the name of **ALMIGHTY ALLAH**, the Propitious, and Sovereign, whose blessings and glory flourished my thoughts and thrived my ambitions. I have the only pearls of my eyes to admire the blessings of the Compassionate and the Omnipotent because the words are bound, knowledge is limited and time is short to express the dignity. I do obeisance in thanks and gratitude for all His blessings, due to which I was able to complete this strenuous work.

All respects for the Holy prophet **Hazrat Muhammad** (Peace Be Upon Him), Who acted as a Torch to show us the right path and Who enabled us to recognize our Creator and understand the philosophy of life.

They say “there is wisdom of head & wisdom of heart”. I know someone who has both. Words are inadequate to express my heartiest obligation and gratitude to my research supervisor **Professor G.M. Peerzada**, Department of Chemistry, University of Kashmir, for his keen interest, proficient suggestions, sympathetic guidance, fatherly care and persistent encouragement. This work would not have been possible without his guidance, support and encouragement. Under his guidance, I successfully overcame many difficulties and learned a lot. During all these years, I have known him as a sympathetic & principled gentleman. His overly enthusiasm & integral view on research & his mission for only ‘high quality work, & not less’ has made a deep impression on me. I also appreciate the care & thoroughness with which he tested & extended my own understanding of this thesis, in spite of his busy schedule. Sir, your teachings will guide me forever and I owe everything to you.

I am extremely indebted to Professor Ghulam Mohammad Rather, Head of the department, for providing necessary infrastructure and resources to accomplish my research work. He has always been there when I needed him.

I am grateful to other faculty members of the department of Chemistry for their warm, affectionate approach and a helping attitude. I convey special acknowledgement to my teacher-cum-friend Dr. Syed Masood Ahmad Rizvi (Assistant Professor) Department of Chemistry, University of Kashmir. During the inevitable ups and downs of conducting my research he often reminded me life’s true priorities and helped me a lot to work for hours together tirelessly. I doubt that I will ever be able to convey my appreciation fully, but I owe him my eternal gratitude. I am extremely obliged to Ms. Vrindha Mam at IIT Bombay for helping in ESR analysis.

I humbly acknowledge the assistance of non-teaching staff of my department especially Ms. Ather Mam, Ms. Humaira Mam, Mr. Hilal Ahmad, Mr. Javeed Ahmad, Mr. Zahoor Ahmad, Mr. Mohammad Iqbal, Mr. Fida Hussain, Mr. Altaf Ahmad and Mr. Tashooq.

I extend huge, warm thanks to my senior fellow labmates, Dr. Nadeem Bashir and Late Ishfaq Ahmad Shah for their cooperative support and timely suggestions. Mr. Ishfaq Ahmad Shah faced his too early death bravely and his example kept me working when I wanted to
give up and I pray Allah to “forgive him and have mercy on him and give him strength and pardon him. Be generous to him and cause his entrance to be wide and wash him with water and snow and hail. Cleanse him of his transgressions as white cloth is cleansed of stains. Give him an abode better than his home, and a family better than his family and a wife better than his wife. Take him into Paradise and protect him from the punishment of the grave and from the punishment of Hell-fire.” I would like to dedicate few lines to him:

You and I will meet again,  
When we’re least expecting it,
One day in some far off place,  
I will recognize your face,
I won’t say goodbye my friend,  
For you and we will meet again.

I am indebted to my fellow labmates Dr. Usma Gul, Muntazir Showkat, Shagufta Rashid, Sna Rashid, Shafia Lateef and Sayima Riyaz for their valuable help and support in the writing of my Ph.D thesis. I would never forget the beautiful moments I shared with my labmates and they were fundamental in supporting me during these stressful and difficult moments. I am highly indebted to Shagufta Rashid for sharing her mid-day meals with me during my Ph.D tenure. Dr. Usma Gul, Shafia Lateef and Sna Rashid deserve special mention here for their constant support, motivation and valuable help. I am highly thankful to my brother-cum-friend Muntazir Showkat for his all timely support and encouragement during this tenure and for the time I stay with him at hostel. I admire his distinguished helping nature.

I am indebted to some of my good friends especially Suhail Ahmad Mir, Shabnum Sarfaraz Khanday, Sikender Ahmad, Bashir Ahmad, Danish Bashir, Syed Gulzar, Aabid Hussain Shah, Murtaza Gani, Tufail Amin Mir, Syed Muzaffar Andrabi, Dr. Nasarul Islam, Dr. Syed Rashid, Dr. Aijaz Ahmad, Dr. Oyais Ahmad Chat, Jahangir Ahmad, Firdous Ahmad, Gulzar Ahmad, Arshid Bashir, Lateef Ahmad and Fayaz Ahmad for their valuable help and support. I am also thankful to the electrochemical group of our Department namely Sarwar Ahmad Pandit, Mudasir Ahmad Rather and Sajad Ahmad Bhat for logistic support.

Most importantly, none of this would have been possible without the love and patience of my parents and loving brother Aadil Gul. My parents and brother to whom this dissertation is dedicated, has been a constant source of love, concern, support and strength all these years. I would like to express my heart-felt gratitude to my uncle, Mr. Ghulam Nabi who has always aided and encouraged me throughout this endeavor. I warmly appreciate the generosity and understanding of my extended family. Finally, I am highly thankful to Masoodi Uncle and all his family members for their all timely support and encouragement during this tenure.

Many other people have welcomed me into their company & shared their learning about life with me. I appreciate all of them for their kind concerns.

Nisar Ahmad Dar Farhad
