Figure-10E.1 Interaction effect of Chemicals and durations on adult mortality of *O. coffeae* under laboratory conditions

Figure-11C.1 Interaction effect of Chemicals and dosages on egg mortality of *O. coffeae* under laboratory conditions

Figure-12A.1 Effect of different treatment schedules of Flufenoxuron 10 DC (Cascade) against *O. coffeae* infesting tea of Dooars, West Bengal, India during Sept.-Oct. 1997 (mean of two applications)

Figure-12B.1 Effect of different treatment schedules of Flufenoxuron 10 DC (Cascade) against *O. coffeae* infesting tea of Dooars, West Bengal, India during April.-May 1998 (mean of two applications)

Figure-13A.1 Effect of different treatment schedules of Azadirachtin-50,000 ppm (Neemazal-F 5%) against *O. coffeae* during May-June, 1996 at Kurseong, Darjeeling, West Bengal, India (mean of two applications)

Figure-13B.1 Effect of different treatment schedules of Azadirachtin-50,000 ppm (Neemazal-F 5%) against *O. coffeae* on tea during second season 1996 at Kurseong, Darjeeling, West Bengal, India (mean of three applications)
Figure-14.1 Bioefficacy of different treatment schedules of Azadirachtin-300 ppm (Bioneem 0.03%) against O. coffeae infesting tea during Sept.-Oct., 1995 at Kurseong, West Bengal, India (mean of three applications)

Figure-15.1 Effect of different treatment schedules of Azadirachtin-3000 ppm (Eco-neem 0.3%) against O. coffeae during April-May, 1995 at Kurseong, West Bengal, India (mean of three applications)

Figure-18A.1 Effect of different application schedules of Colloidal sulphur (Microsulf-52'S) in control of O. coffeae during Spring, 1996 at Dooars, West Bengal, India (mean of three applications)

Figure-19B.1 Effect of different application schedules of Colloidal sulphur (Microsulf-52'S) in control of O. coffeae during 'Post-monsoon' 1996 at Dooars, West Bengal, India (mean of three sprayings)

Figure-20B.1 Effect of different application schedules of Liquid sulphur (Microsulf-20 S) in control of O. coffeae during 'Pre-monsoon' 1995 at Dooars, West Bengal, India (mean of three sprayings)

Figure-21.1 Effect of different application schedules of Liquid sulphur (Microsulf-20 S) in control of O. coffeae during post-monsoon, 1995 at Dooars, West Bengal, India (mean of three sprayings)
