

ACKNOWLEDGEMENT

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of five years of work whereby I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them.

The foremost person I would like to thank is my mentor Prof. Kamalendu Dey of Department of Chemistry, University of Kalyani. During these years I have known Prof. Dey as a sympathetic and principle-centered person. His overly enthusiasm and integral view on research and his mission for providing quality work has made a deep impression on me. I owe him immense gratitude for having me shown the way of research. I am also much thankful to my co-supervisor Dr. B. B. Bhaumik, Reader, Department of Chemistry, University of Kalyani.

I would like to thank Susobhan, Ranabir and Sanjib who kept an eye on the progress of my work and always were available when I needed their advises and all other members of my laboratory.

This research has been supported and funded by University of Kalyani. I thank them all for their confidence in me. I am also grateful to the Department of Chemistry, University of Kalyani for providing me an excellent work environment during the past years and all the teaching and non-teaching staff for their cheerful assistance.

I am grateful to IICB, Kolkata; IACS, Kolkata and SAIF, CDRI, Lucknow for some experimental help. Facilities provided by the DST, Govt. of India, New Delhi under FIST are also gratefully acknowledged.

I am grateful to all of my collaborators, Dr. T. Kar of Utah State University, Dr. G. P. A. Yap of University of Delaware, Dr. A. Aydogdu and Dr. F. Dagdelen of Firat University, Dr. T. Basu of University of Kalyani and Dr. G. Mostafa of Jadavpur University.

I am also thankful to all the colleagues of Santipur College, especially to Amarjit and all the boarders of R. S Hall (Men's), particularly Arindam and Animesh.

I feel a deep sense of love and gratitude to my most beloved parents and my little brother Bua, for rendering me the sense and the value of togetherness and encouraging me in every circumstance. I am really glad to be a member of such a heartening and heavenly family.

Last but not the least, I am indebted to Aparna, for her adore and patience which she has bestowed upon me since my graduation days. Her very presence and perseverance has given me enough nerve and potency to complete my doctoral journey.
