# LIST OF TABLES

2.1 Properties of Diesel and Diethyl Ether ........................................ 20
4.1 Experimental and Simulation Conditions for Cavitation Validation ... 57
4.2 Comparison of Experimental and Simulation Values ....................... 58
4.3 Simulation Conditions - Effect of Injection Pressure ....................... 60
4.4 Simulation Conditions - Effect of Nozzle Geometry and Back Pressure . 60
4.5Simulation Conditions - Blends of Diethyl Ether and Diesel ............. 61
5.1 Injector Flow Parameters - Different Orifice Diameters .................. 74
5.2 Injector Flow Parameters - Different Included Angles .................. 76
5.3 Injector Flow Parameters - Different Back Pressures ................... 79
6.1 Test and Simulation Conditions for Heptane and Diesel Fuel - ECN Sandia 91
6.2 Model Constants for Discrete Phase Model ................................. 91
6.3 Constant Volume Conditions for Spray Study .............................. 94
