### List of Plates

<table>
<thead>
<tr>
<th>Plate Nos.</th>
<th>Plate contents</th>
<th>Page Nos</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2.</td>
<td>Different age levels of seed pods.</td>
<td>28</td>
</tr>
<tr>
<td>4.1.</td>
<td>Different age level of seeds of <em>V. coerulea</em> after dissection and their germination.</td>
<td>48</td>
</tr>
<tr>
<td>4.2.</td>
<td>Seeds of 6-7 months old seed pod of <em>D. nobile</em> after dissection and their germination.</td>
<td>50</td>
</tr>
<tr>
<td>4.3.</td>
<td>Seeds of 6-7 months old seed pod of <em>P. insigne</em> after dissection and their germination.</td>
<td>54</td>
</tr>
<tr>
<td>4.4.</td>
<td>Effect of auxins and cytokinins on growth and development of seedlings of <em>V. coerulea</em>.</td>
<td>58</td>
</tr>
<tr>
<td>4.5.</td>
<td>Effect of auxins and cytokinin on growth and development of seedlings of <em>D. nobile</em>.</td>
<td>60</td>
</tr>
<tr>
<td>4.6.</td>
<td>Effect of auxin and cytokinin along with complex additives on growth and development of seedlings of <em>P. insigne</em>.</td>
<td>62</td>
</tr>
<tr>
<td>4.7.</td>
<td>Effect of complex additives on growth and development of seedling of <em>V. coerulea</em>.</td>
<td>64</td>
</tr>
<tr>
<td>4.8.</td>
<td>Effect of complex additives on growth and development of seedling of <em>D. nobile</em>.</td>
<td>66</td>
</tr>
<tr>
<td>4.9.</td>
<td>Regeneration of PLBs/shoot bud from basal part of intact leaves / roots from six months old axenic seedling of <em>V. coerulea</em>.</td>
<td>72</td>
</tr>
<tr>
<td>4.10.</td>
<td>Frequency of shoot bud regeneration from different nodes of six month old axenic seedlings of <em>D. nobile</em>.</td>
<td>74</td>
</tr>
<tr>
<td>4.11.</td>
<td>Shoot bud regenerated from root segment (1st formed) of eight months old axenic seedlings of <em>P. insigne</em>.</td>
<td>76</td>
</tr>
<tr>
<td>4.12.</td>
<td>Rooting of regenerated shoots developed from different explants of <em>V. coerulea</em>.</td>
<td>78</td>
</tr>
<tr>
<td>4.13.</td>
<td>Rooting of regenerated shoots developed from nodal explants of <em>D. nobile</em>.</td>
<td>80</td>
</tr>
<tr>
<td>4.14.</td>
<td>Rooting of regenerated shoots developed from root explants of <em>P. insigne</em>.</td>
<td>80</td>
</tr>
<tr>
<td>4.15.</td>
<td>Inoculation of different plant parts from field grown plant of <em>V. coerulea</em>.</td>
<td>82</td>
</tr>
<tr>
<td>4.16.</td>
<td>Inoculation of different plant parts from field grown plant of <em>D. nobile</em>.</td>
<td>84</td>
</tr>
<tr>
<td>4.17.</td>
<td>Inoculation of different plant parts from field grown plant of <em>P. insigne</em>.</td>
<td>86</td>
</tr>
<tr>
<td>4.18.</td>
<td>Production of synthetic seed by encapsulation of PLBs regenerated from leaf base of <em>V. coerulea</em> and their germination.</td>
<td>88</td>
</tr>
<tr>
<td>4.19.</td>
<td>Production of synthetic seed by encapsulation of PLBs originated from seeds of <em>D. nobile</em> and their germination.</td>
<td>96</td>
</tr>
<tr>
<td>4.20.</td>
<td>Hardening stage of <em>V. coerulea</em>.</td>
<td>98</td>
</tr>
<tr>
<td>4.21.</td>
<td>Hardening stage of <em>D. nobile</em>.</td>
<td>98</td>
</tr>
<tr>
<td>4.22.</td>
<td>Hardening stage of <em>P. insigne</em>.</td>
<td>98</td>
</tr>
<tr>
<td>4.23.</td>
<td>Different binding substrata used for acclimatization of <em>V. coerulea</em> in shed house.</td>
<td>100</td>
</tr>
<tr>
<td>4.24.</td>
<td>Different binding substrata used for acclimatization of <em>D. nobile</em> in shed house.</td>
<td>102</td>
</tr>
<tr>
<td>4.25.</td>
<td>Acclimatization of <em>P. insigne</em> in shed house.</td>
<td>102</td>
</tr>
<tr>
<td>4.26.</td>
<td>Different host tree used for ultimate establishment of plantlets of <em>V. coerulea</em> in natural condition.</td>
<td>104</td>
</tr>
<tr>
<td>4.26.</td>
<td><em>In vitro</em> raised plantlets of <em>V. coerulea</em>.</td>
<td>104</td>
</tr>
<tr>
<td>4.27.</td>
<td>Different host tree used for ultimate establishment of plantlets of <em>D. nobile</em> in natural condition.</td>
<td>106</td>
</tr>
<tr>
<td>4.27.</td>
<td><em>In vitro</em> raised plantlets of <em>D. nobile</em>.</td>
<td>106</td>
</tr>
<tr>
<td>4.28.</td>
<td>Different potting media used for ultimate establishment of plantlets of <em>P. insigne</em> in natural condition.</td>
<td>108</td>
</tr>
<tr>
<td>4.29.</td>
<td>Microscopic view of chromosomes of <em>V. coerulea</em>.</td>
<td>110</td>
</tr>
<tr>
<td>4.30.</td>
<td>Microscopic view of chromosomes of <em>D. nobile</em>.</td>
<td>112</td>
</tr>
<tr>
<td>4.31.</td>
<td>Microscopic view of chromosomes of <em>P. insigne</em>.</td>
<td>114</td>
</tr>
