Acknowledgement

After an intensive period of almost four years, today is the day: writing this note of thanks is the finishing touch on my thesis. It has been a period of intense learning for me, not only in the scientific arena, but also on a personal level. Writing this thesis has had a big impact on me. I would like to reflect on the people who have supported and helped me so much throughout this period.

I would first like to thank my Guide and one of the most respectable Human Being of my life, Dr. O.S.K.S. Sastri. He has provided constant supervision throughout, given ample opportunities to conduct the research and has also given moral and emotional support, whenever the path seemed tough and rough. His encouraging words and thoughts will always continue to enlighten the life ahead. And I offer an equal gratitude towards my second Supervisor, Prof. Arbind K. Jha, for the valuable educational and inspirational inputs given by him for the present research.

Next to be acknowledged for this research, are my family members. The list is long, but all deserve a mention, for it was their love and care that has constantly motivated me to move ahead in my work, without getting distracted. Foremost thanks in this regard should go to my beloved Husband Dr. Amit Gangotia and my in-laws, who have allowed me to fulfill my dream of pursuing Ph.D. My father-in-law Shri P.L. Gangotia, mother-in-law Smt. Gargi Devi, sister-in-law Mrs. Rashim, have to be credited for looking after my Daughter, Saisha, in my absence without making her realize, that her mother is away. My brothers-in-law, Major Ravi Kant and Mr. Rajeev have always made me cheerful with their wonderful sense of humor. And it was Sai-Ansh, Sai-Abhigyan and Saisha whose smiles have always made my tiring evenings as memorable ones by making me forget the exhaustive experience at the University.

My parents, Shri Pardeep Kumar Bhardwaj and Smt. Veena Bhardwaj deserve a
special mention for it was them, who have not only groomed and nourished me since my childhood, but has also made me strong enough so that I was ready to take up this challenge of doing Ph.D. despite of it being a challenging task, with a toddler daughter beside me. My siblings Deepika and Sumit have been constant pillars of strength, love, care and humor throughout my life and these four years as well. I owe so much to them. My brother-in-law, Shri Sandeep Chandel has always been concerned towards the completion of my research, I am grateful to him as well for constantly motivating me in this regard.

Then, I would like to thank my co-researcher, Ms. Vandana Sharda, to whom I am indebted in many ways. She has collaborated wonderfully during the complete tenure of the present research with her involvement. It is difficult to imagine the successful completion of this research without her presence. We were not only able to support each other by deliberating over our problems and findings, but also happily by talking about things other than just our papers.

I would also like to express my gratitude towards Head of the Department, Dr. B.C. Chauhan, all the teachers and students of Department of Physics & Astronomical Science, who have helped in one way or the other to complete this study. A special mention here is to be made of Dr. Jagdish Kumar, who, being a Solid State Physics Expert, was always willing to help and has given his valuable inputs for this research. Similarly, Dr. Anu G S, has provided me with his constant guidance, regarding the field of Education research. Various other experts to be acknowledged in this regard have been the following:

- Prof. P.K. Ahluwalia, Himachal Pradesh University, Shimla
- Prof. K.B. Joshi, Central University of Himachal Pradesh
- Ms. Renuka Bhatti, HMV Jalandhar, Punjab

- Kunwer Rajeev, DAV College, Jalandhar, Punjab
- Dr. Sapna Sharma, St. Bede’s College, Shimla
All the batches of M.Sc.(Spl. Theoretical Physics) at CUHP till present, 2011-13 batch, 2012-14 batch, 2013-15 batch, 2014-16 batch and 2015-17 batch, have been an integral part of the present research. Without the valuable inputs given by them regarding
their understanding of the subject, and without the golden chance of teaching these wonderful students, this Solid State Physics based Education Research would have been impossible. All the RD scholars of Department of Physics & Astronomical Science have also provided their help and support towards this research, whenever needed. Special mention here is to be made of Mr. Suresh and Mr. Abhinav Nag for they have spared their valuable time in order to help me in numerous ways.

In a similar manner, I am highly thankful to the students and teachers of the following educational institutes:

- Govt. Degree College, Dharamshala
- MCM DAV College, Kangra
- Amity University, NOIDA
- HMV, Jalandhar
- DAV College, Jalandhar
- Govt. Degree College, Chamba
- Govt. Degree College, Nagrota Bagwan
- Govt. Senior Secondary School, Tiara
- Various Govt. and Private Schools located at Palampur and nearby places.

as all these people have given a significant contribution towards the completion of this research.

This acknowledgement is incomplete without mentioning the names of few people who have helped in conducting the research in an subtle and crucial manner. The foremost name in this category is of Mr. Mahesh Sharma, who was my senior research scholar in the discipline of Mathematics and has always been kind, ready to listen and has always given sound and useful piece of advice whether it was with regard to any technicalities or related to academics. I also express my gratitude towards Mr. Prashant Singh, who has been constantly helping us by giving his technical support whenever required. Also included in this list is the name of Mr. Amit Katoch, Ms. Swati, Mr. Rishi, Mr. Jagdish Saini and all my batch-mates
(RD Scholars, 2012-15 batch), who have been patient listeners and selfless supportive pillars throughout this research. Ms. Pooja Katoch, Ms. Reena Chauhan and Ms. Shashi Kaundal, these are the names of those respectable ladies, to whom I am highly grateful as these three looked after my daughter, when I was busy in my data collection process. I would also like to thank Ms. Shailja, DEO at Department of Physics & Astronomical Science and Mr. Umesh, for their help and support throughout this research.

Thank you very much, everyone!

Jyoti Bhardwaj

Dharamshala, Himachal Pradesh

August, 2016.
