Acknowledgements

Every act of human being is under the adjudication of the most exalted and omnipotent almighty Allah. In this light, I vivaciously express the deepest extent of my thankfulness and reverence to Allah on whose will and blessing I am able to complete my Ph.D. thesis.

The process of writing Ph.D. thesis is a long journey which takes several years to complete. It is just like climbing a high peak step by step accompanied with dedication, courage and encouragement with so many people’s kind help and sincere advice. During this exciting and stimulating, but at the exhausting and exciting journey, I have an excellent group of people who supported and encourage me in my difficult times. It is a pleasant task to express my thanks to all those who contributed in one way or the other to give the final shape of the thesis which is an unforgettable experience for me.

It gives me immense pleasure to have the privilege of extending my heartfelt gratitude and sincere thanks to my esteemed supervisor Prof. Abdul Wafi, Head, Department of Mathematics, Jamia Millia Islamia, New Delhi, who has inspired and nurtured curiosity and creativity in me for mathematics. This thesis would not have been possible without his valuable guidance, expert advise, support and constant encouragement which he has shown towards me all these years during the preparation of this thesis. Being my supervisor, his involvement with this work goes right from the start with the selection of the topic and the suggestion of resource materials to the valuable inputs, checking and correction of the initial and subsequent drafts. Under his guidance, I successfully overcome many difficulties and learned a lot.

I wish to thank to the teaching, non-teaching and technical staffs of the department of mathematics for their help, co-operation and support throughout the completion of my research work.

I am also grateful to my research fellows Dr Mohammad Mueenul Hasnain, Dr Md Nasiruzzaman, Dr Abul Basar, Mr Naved Akhtar, Mr Kamran, Mr Muzaffar Ahmad Bhat, Mr Aquib, Mr Sabahat Ali Khan and Mr Aakif Fairooze for their constant encouragement, moral support and their friendly assistance.

Above and beyond all, I take this moment to express my never ending love and respect towards my loving parents Mr Nafees Ahmad and Mrs Raheesa Begum who have always provided me a constant source of joy, moral support, love, encouragement and purpose throughout my study. The time they spent, the opportunities they provided, the instruction
they gave continuously to bless my life. I would also like to thank my family members especially my brother Mr Waseem Rao and my brother in law Mr Nazim Rao for their constant encouragement to achieve my academic goal.

Mere words would not be enough to appreciate the support and cooperation of my wife Mrs Nazma Rao, during the course of my research work. She showed a great deal of tolerance and motivated me in difficult times. I express my indebtedness and appreciation to my beloved wife who deserves all praise for being cheerfully with all the inconvenience and hardships which she has faced during this period.

I am thankful to University Grant Commission (UGC) and Jamia Millia Islamia, New Delhi for providing financial assistance as Basic Scientific Research (BSR)-fellowship and Non-Net fellowship which helped me to do my research work comfortably.

Finally, I would like to thank everybody who has by one way or other supported me morally for the successful completion of this thesis.
