Chapter I: Chemistry of pyrazolones and their metal complexes

1.1) Introduction 1
1.2) Synthesis of pyrazolones 6
1.3) Properties of pyrazolones 13
1.4) Biological activity and uses of pyrazolones 15
1.5) Complexes of pyrazolones 18
1.6) Scope of the Present Work 25
1.7) References 27

Chapter 2: Experimental techniques

2.1) Materials 35
2.2) Water 35
2.3) Apparatus 35
2.4) Elemental analysis 35
2.5) Magnetic susceptibility 37
2.6) Electronic spectra 38
2.7) Conductivity 40
2.8) Infrared Spectroscopy 40
2.9) Nuclear Magnetic Resonance (NMR) Measurements 41
2.10) Mass spectra 42
2.11) Electron Spin Resonance (ESR) Measurement 43
2.12) X-Ray Diffraction Studies 45
2.13) References 46

Chapter 3: The chemistry of synthesized pyrazolone derivatives

3.1) Introduction 47
3.2) synthesis of Ligands 47
   a) Synthesis of acid hydrazides 47
   b) Synthesis of HBMP, ABMP and BMP 48
   c) Synthesis of HBDPP, ABDPP and BDPP 48
3.3) Characterization and Spectral studies of ligands 49

3.3.1) Properties 49

3.3.2) Electronic spectra of Ligands 51

3.3.3) Infrared spectral study of Ligands 55

A) Infrared spectrum of HBMP 56
B) Infrared spectrum of ABMP 58
C) Infrared spectrum of BMP 58
D) Infrared spectrum of HBDPP 62
E) Infrared spectrum of ABDPP 64
F) Infrared spectrum of BDPP 67

3.3.4) NMR Spectral study of Ligands 68

(A) $^1$HNMR and $^{13}$CNMR spectrum of HBMP 68
(B) $^1$HNMR spectrum of ABMP 74
(C) $^1$HNMR spectrum of BMP 75
(D) $^1$HNMR, $^{13}$CNMR and Mass spectra of HBDPP 75
(E) $^1$HNMR spectrum of ABDPP 76
(F) $^1$HNMR spectrum of BDPP 77

3.4) Conclusion 83

3.5) References 85

Chapter 4: Study of transition metal complexes with pyrazolone derivatives

4.1 Copper(II) complexes

4.1.1] Introduction 88
4.1.2] Synthesis of Cu(II) Complexes 89
4.1.3] Properties of Cu(II) complexes 90
4.1.4] Magnetic susceptibility of Cu(II) complexes 90
4.1.5] Electronic spectral study of Cu(II) complexes 93
4.1.6] Infrared spectral study of Cu(II) complexes 97
4.1.7] ESR spectral study of Cu(II) complexes 104
4.1.8] XRD 111

4.2 Nickel(II) complexes
4.2.1] Introduction 115
4.2.2] Synthesis of Ni(II) complexes 116
4.2.3] Properties of Ni(II) complexes 116
4.2.4] Magnetic susceptibility of Ni(II) complexes 118
4.2.5] Electronic spectral study of Ni(II) complexes 119
4.2.6] Infrared spectral study of Ni(II) complexes 122
4.2.7] XRD 128

4.3 Cobalt(II) complexes
4.3.1] Introduction 130
4.3.2] Synthesis of Co(II) complexes 131
4.3.3] Properties of Co(II) complexes 131
4.3.4] Magnetic susceptibility of Co(II) complexes 133
4.3.5] Electronic spectral study of Co(II) complexes 135
4.3.6] Infrared spectral study of Co(II) complexes 138
4.3.7] XRD 143

4.4 Iron(II) complexes
4.4.1] Introduction 145
4.4.2] Synthesis of Fe(II) complexes 146
4.4.3] Properties of Fe(II) complexes 146
4.4.4] Magnetic susceptibility of Fe(II) complexes 146
4.4.5] Electronic spectral study of Fe(II) complexes 149
4.4.6] Infrared spectral study of Fe(II) complexes 156

[XI]
4.5 Manganese(II) complexes

4.5.1] Introduction 159
4.5.2] Synthesis of Complexes 160
4.5.3] Properties 160
4.5.4] Magnetic susceptibility of Mn(II) complexes 162
4.5.5] Electronic spectral study of Mn(II) complexes 163
4.5.6] Infrared spectral study of Mn(II) complexes 166
4.5.7] XRD 171

4.6 Conclusion 173

4.7 Structures of metal(II) complexes 175

4.8 References 177

Chapter 5: Biological activity

5.1] Introduction 188
5.2] Experimental 188
5.3] Procedure 189
5.4] Result and Discussion 189
5.5] References 191

Summary 193

Publications 196

Scope for further work 198
