ACKNOWLEDGEMENTS

This thesis is the result of many years of work, whereby I have been accompanied and supported by many people. It is a pleasant opportunity to express my gratitude for all of them.

First and foremost, I would like to express my sincere gratitude to my supervising guide Dr. Yogalakshmi K.N. for her constant encouragement, valuable suggestions and inspiring directions throughout the tenure of the present study. Her constant support and evaluation have always been there behind every achievement of my research career.

I am thankful to Prof. R.K. Kohli, the honourable Vice Chancellor of CUPB, Prof. P. Ramaraoo, Dean Academic Affairs and Prof. V.K. Garg, COC, Centre for Environmental Science and Technology for providing me necessary infrastructure and resources to accomplish this research work.

I would thank to Dr. J. Nagendra Babu, Assistant Professor, Department of Chemical Sciences for his immense help in AAS analysis. I also thank to Dr. Pankaj Bhardwaj, Assistant Professor, Plant Sciences for his support and guidance in 16S rRNA analysis.

I am also thankful to Prof. Sanjay Mishra from IFTM University, Moradabad, Uttar Pradesh, India for allowing me to carry out a piece of my study there. Further I would acknowledge SAIF, IIT Madras for ICP-OES analysis and Tamil Nadu Agriculture University, Coimbatore for providing me Sunflower seeds for my study.

I owe my deepest sense of gratitude to my friends and lab mates Anamika Das, Jaskiran Kaur, Jatinder Singh, Gini, Vijay Jaswal, Ravindra, Ravi Shankar, Sapna Thakur, Shruti Chaudhary and Pooja for their genuine help in the course of my Ph.D.

Last but not the least, I would like to thank my family for their invaluable support and love.

I offer my prayer of gratitude to the almighty God for his blessings and grace to bestow his benevolence on all.

(Manohari Kumari)
