List of Tables

Table 1. Checklist of the intertidal macrofauna recorded at various sampling sites along the Saurashtra coast during the study period. 44

Table 2. Checklist of the intertidal algae recorded at various sampling sites along the Saurashtra coast during the study period. 49

Table 3. Sorenson’s index of similarity for occurrence of intertidal molluscan species at four sampling sites. 52

Table 4. Inter-relation between various heavy metal concentrations at four selected sampling sites of Saurashtra coastline. 100

Table 5. Result of the one-way ANOVA of the values of different ecological attributes between the sampling sites of Saurashtra coastline. 127

Table 6. Results of the ANOVA between the mean density values of the species studied, in each of the littoral zone, of the four sampling sites. 127

Table 7. Result of the ANOVA between the mean abundance values of the species studied, in each of the littoral zone, of the four sampling sites. 128

Table 8. Result of the ANOVA between the mean frequency values of the species studied, in each of the littoral zone, of the four sampling sites. 128

Table 9. Result of the ANOVA of the mean density values of the species studied, in four sampling sites between each of the littoral zone. 129

Table 10. Result of the ANOVA of the mean abundance values of the species studied, in four sampling sites between each of the littoral zone. 129

Table 11. Result of the ANOVA of the mean frequency values of the species studied, in four sampling sites between each of the littoral zone. 130

Table 12. Results of regression coefficient ($R^2$) analysis between seasonal density and mean value of heavy metals at sampling site Dwarka. 130

Table 13. Results of regression coefficient ($R^2$) analysis between Seasonal density and mean value of heavy metals at sampling site Mangrol. 131

Table 14. Results of regression coefficient ($R^2$) analysis between Seasonal density and mean value of heavy metals at sampling site Veraval. 131
Table 15. Results of regression coefficient (R\textsuperscript{2}) analysis between Seasonal density and mean value of heavy metals at Sampling site Kodinar.

Table 16. Results of regression coefficient (R\textsuperscript{2}) analysis between Seasonal abundance and mean value of heavy metals at sampling site Dwarka.

Table 17. Results of regression coefficient (R\textsuperscript{2}) analysis between Seasonal abundance and mean value of heavy metals at sampling site Mangrol.

Table 18. Results of regression coefficient (R\textsuperscript{2}) analysis between Seasonal abundance and mean value of heavy metals at sampling site Veraval.

Table 19. Results of regression coefficient (R\textsuperscript{2}) analysis between Seasonal abundance and mean value of heavy metals at sampling site Kodinar.

Table 20. General coastal water quality standard for aquatic life (Limiting value for concentration in mg/l).
