ACKNOWLEDGEMENTS

For the constant encouragement and support of
Dr. Bhargava, the scientific and culture architect of CCMB,
other scientists and scientific staff who uphold this
architecture.

For their untiring help beyond what the duty demands
people from different groups such as Instrumentation,
Photography, Workshop, Administration, Drawing Section,
Stores and Purchase, Lab Services, Fine Chemical Stores,
Canteen and Security.

Chandramohan, Laxminarasimha Rao, Venugopal,
my gratitude has been increasing in proportions since last five
years and it would be very difficult to express in black and
white.

K.N. Ganesh and Dipankar Chatterji
people at home
Sivakami, Vijaya
other people from our groups
Research Fellows

acknowledging them some way would be condensing my feelings too
much and I think I will be expressing it personally than by any
other means.
I was extremely fortunate to have Dr. K.N. Ganesh (presently at N.C.L., Pune) and Dr. Dipankar Chatterji as my 'gurus' during my Ph.D. time. They are the people whose abilities I envy and try hard to emulate.

My special thanks are to

Arif for his patience in typing this thesis
Ramakrishna for proofreading
K.V.R. Chary of TIFR, Bombay, for his help in NMR
500 MHz NMR facility group, TIFR, Bombay and special instruments facility group, IISc, Bangalore for recording NMR spectra

Dr. R.T. Sauer and Dr. A.K. Vershon of M.I.T., USA, for supplying the Mnt overproducing strains and exchanging their results prior to publication

lastly to CSIR, India, for the very valuable help in the form of fellowship.

G.V. RAJENDRA KUMAR
