ACKNOWLEDGEMENT

Words may fail to express my gratitude towards Dr. Rajendra Prasad, Associate Professor, for his thoughtful suggestions, innovative ideas and enthusiastic cooperation. The love he bestowed on me during my stay will have lingering memory for years to come. I owe my thanks to Prof. G.S. Singhal whose critical appraisal and invaluable discussions helped to bring this thesis to fruition.

To Prof. P.C. Kesavan (Dean), Prof. Sivatosh Mukerjee (FNA), Dr. (Mrs) Najma Zaheer Baquer and Prof. Asis Dutta, I owe much for their censorious advice and interest.
For help in preparing the thesis, I must express my deepest thanks to Shailja and Anil, who examined each statement with microscopic attention and ruthlessly skewered many bad phrases.

Again, it was a pleasure to work with Dr. Manjeet Singh, Dr. A. Jayakumar, Mr. K. Manoharan, Mr. R.S. Verma, Mr. T.V.G. Rao and Mr. Harpal Sharma during this short-span of learning.

In writing this thesis, I have benefited greatly from the advice, criticism and encouragement of many colleagues particularly Vinod, Vishnu, Suhas, Mayanil, Aditya, Ashok, Vinay, Rishi and Pankaj.

I am especially grateful to Mr. R.N. Saini for his marvellous touch to diagrammatic and photographic sections. I particularly wish to thank Gajju and Alex for their excellency in typing and technical assistance, respectively.

But above all, I owe much to my teacher Shri Devi Dutta Srivastava for being a source of determination and inspiration.

Not least but the most, I am deeply indebted to my parents and Manshadi for their encouragement,
patience and good spirit throughout the tenure of completion of this thesis.

Finally, I acknowledge the Council of Scientific and Industrial Research, India, for the financial assistance as a Junior/Senior Research Fellow.
