ACKNOWLEDGEMENTS

It is with great pleasure that I place on record my deep sense of gratitude, respect and obligation to my research supervisor Dr. G. Vijay Nair for suggesting very interesting research problems, his inspiration, constant encouragement and timely criticisms.

I am grateful to the Director, Regional Research Laboratory, Trivandrum for providing all the laboratory facilities to carry out this work.

My sincere thanks are due to Dr. Nigam P. Rath of the University of Missouri, U. S. A. for single crystal X-ray analyses reported in this thesis; Dr. Guenter K. Eigendorf of the University of British Columbia, Canada and Dr. Vairamony of IICT Hyderabad for high resolution mass spectra; Prof. S. Chandrasekaran of I. I. Sc. Bangalore and Prof. Basavaiah of the University of Hyderabad for providing elemental analysis. Thanks are also due to Ms. Soumini Mathew for providing $^1$H and $^{13}$C NMR spectra and Dr. N. Manoj, Photochemistry Research Unit for his help in carrying out theoretical calculations.

I would like to express my thanks to Dr. K. V. Radhakrishnan and Dr. G. Anilkumar for their suggestions, help and support extended to me for the successful completion of the work. Thanks are also due to all the present and former colleagues and friends in the Organic Chemistry Division and Photochemistry Research Unit for their help and co-operation during the course of my work.

Financial assistance from CSIR, New Delhi and the American Cyanamid Company (Agricultural Research Division), U. S. A. is greatly acknowledged.

Finally, I wish to express my deepest gratitude and appreciation to my family members for their constant encouragement throughout my academic career.

Bini Mathew
