ACKNOWLEDGEMENTS

I would like to express my sincere thanks to Professor D. N. Rao for his constant encouragement, advice and expert guidance. I have gained immensely from him during the initiation, progress and completion of this study. I am particularly thankful to his patient hearing of my ideas and his appreciation and constructive criticism of the same. I will always cherish this period.

I would also like to thank all the faculty members and the administrative staff of the Centre for Economic Studies and Planning, Jawaharlal Nehru University for their support.

My sincere thanks go to Dr. (Mrs.) S. K. Jolly, Principal Shyama Prasad Mukherji College (for women), University of Delhi, for her support.

I am thankful to my sister N. Sangeeta for her colossal help during various stages of the study.

This work would not have taken its final shape without the support from my family.
