

CONTENTS

Chapter	Title	Page No.
	Preface	ii-iii
	Abbreviations	iv-vi
	List of Figures	viii-xi
	List of tables	xii
	Abstract of the thesis	xiv-xiv
I	Introduction and Review of Literature	1-30
	Scope of the study	31
II	Materials and Methods	33-57
III	Magnetic nanoparticles directed delivery of Berberine - a cytotoxic phytoceutical, for tumor control	59-75
IV	Effect of hypoxic cell sensitizer, Sanazole on transcription of <i>hif-1α</i> and its target genes in tumor cells	77-88
V	Anticancer Property of Complexes of Iron-Oxide Nanoparticle with Berberine and Sanazole: an In Vitro Study	89-103
VI	Tissue distribution of Nanoparticle- drug complexes and effect of these complexes on tumor angiogenesis	105-117
VII	Tumor control by chemo-targeting of Nanoparticle-drug complexes: Control of solid tumor in mice by targeting Iron oxide nanoparticle-Berberine complexes with Sanazole	119-139
VIII	A comparative study of targeting nanoparticle-drug complexes to tumor by magnetic field and hypoxic cell sensitizer	141-152
IX	Chemo-directed specific targeting of nanoparticle- doxorubicin complexes to tumor in animal model	153-174
X	Summary and Conclusion	175-179
	Bibliography	181-219
	List of Publications	221-223
