	CERTIFICATE	ii
	DECLARATION	iii
	ACKNOWLEDGEMENT	iv
	TABLE OF CONTENTS	vi
	LIST OF TABLES	xi
	LIST OF FIGURES	xiii
	ABBREVIATIONS AND SYMBOLS	xv
CHAPTER I	INTRODUCTION	1
	1.1 Environmental Pollution	1
1.2	Forms of Pollution	2
	1.2.1 Air pollution	2
	1.2.2 Littering	2
	1.2.3 Noise Pollution	2
	1.2.4 Soil pollution	3
	1.2.5 Radioactive pollution	3
	1.2.6 Thermal pollution	3
	1.2.7 Water pollution	3
1.3	Water pollution	4
	1.3.1 Types of Water Pollutants	5
	1.3.2 Effects of Water Pollution	6
1.4	Heavy Metals and Dyes	7
	1.4.1 Beneficial Heavy Metals	7
	1.4.2 Toxicity of Heavy Metals	8
	1.4.3 The Sources and Effects	9
	1.4.4 Dyes	13
1.5	Treatment Methods	16
	1.5.1 Precipitation	17
	1.5.2 Ion exchange	18
1.5.3	Membrane Filtration	18
	1.5.3.1 Ultra filtration	19
	1.5.3.2 Nano filtration	19
	1.5.4 Reverse Osmosis	19
	1.5.5 Electro dialysis	20
	1.5.6 Solvent extraction	20

1.5.7	Cementation	21
1.5.8	Evaporation	21
1.5.9	Oxidation	22
1.5.10	Biological degradation	22
1.6	Adsorption	22
1.6.1	Physical adsorption (Physisorption)	23
1.6.2	Chemical adsorption (Chemisorptions)	24
1.7	Sorption, occlusion	24
1.7.1	Activated Carbon	25
1.7.2	<i>Gloriosa superba stem</i>	26
1.8	Review of Literature	27
CHAPTER II AIM, OBJECTIVES AND SCOPE OF THE PRESENT RESEARCH WORK		42
2.1	Aim	42
2.2	Specific Objectives	42
2.3	Scope of the Present Work	43
CHAPTER III MATERIALS AND METHODS		46
3.1	Materials	46
3.1.1	Chemicals	46
3.1.2	Cleaning of Glass wares	46
3.1.3	Preparation of metal ion solutions	46
3.1.4	Preparations of dye solutions	47
3.1.5	Preparation of Adsorbent	47
3.2	Characterization of AGSNC adsorbent	48
3.2.1	Determination of Particle size	48
3.2.2	Density	48
3.2.3	Moisture content	48
3.2.4	Loss on ignition	49
3.2.5	Water soluble matter	49
3.2.6	pH of aqueous solutions	50
3.2.7	Zero point charge (pHzpc)	50
3.3	Methodology	51
3.3.1	Batch equilibration method	52
3.3.2	Effect of Variable Parameters	53
3.3.2.1	Dosage of adsorbents	53
3.3.2.2	Initial concentration	53
3.3.2.3	Contact time	53
3.3.2.4	Initial pH	53

3.3.2.5	Other Ions	54
3.3.2.6	Temperature	54
3.4	Adsorption isotherms	54
3.5	Adsorption kinetics	55
3.5.1	The pseudo-second-order equation	55
3.5.2	The Elovich equation	56
3.5.3	Intraparticle diffusion model	57
3.6	Thermodynamic parameters	57
3.7	Desorption studies	58
3.8	Data Analysis	58
CHAPTER IV RESULTS AND DISCUSSION		59
4	REMOVALS OF HEAVY METAL IONS AND DYES	59
4.1	ADSORPTION OF Fe(II) ION USING AGSNC	60
4.1.1	Effect of contact time and initial Fe(II) ions concentration	60
4.1.2	Effect of Dosage	60
4.1.3	Effect of pH	61
4.1.4	Effect of the ionic strength on the adsorption of Fe(II) ions	61
4.1.5	Theory of Adsorption isotherm	62
4.1.5.1	Freundlich isotherm	62
4.1.5.2	Langmuir isotherm	62
4.1.6	Thermodynamic treatment of the adsorption process	63
4.1.7	Adsorption kinetics	64
4.1.8	Desorption studies	64
4.1.9	Evidence of Adsorption	65
4.2	ADSORPTION OF Cu(II) ION USING AGSNC	72
4.2.1	Effect of contact time and initial Cu(II) ion concentration	72
4.2.2	Effect of Dosage	72
4.2.3	Effect of pH	73
4.2.4	Effect of the Ionic Strength	73
4.2.5	Adsorption isotherms	74
4.2.5.1	Freundlich isotherm	74
4.2.5.2	Langmuir isotherm	74
4.2.6	Thermodynamic treatment of the adsorption process	75
4.2.7	Adsorption kinetics	75
4.2.8	Desorption studies	77

4.3	ADSORPTION OF Cr(VI) ION USING <i>AGSNC</i>	81
4.3.1	Effect of contact time and initial Ni(II) ion concentration	81
4.3.2	Effect of dosage	81
4.3.3	Effect of pH	82
4.3.4	Effect of the Ionic Strength	82
4.3.5	Adsorption isotherms	83
4.3.5.1	Freundlich isotherm	83
4.3.5.2	Langmuir isotherm	83
4.3.6	Thermodynamic treatment of the adsorption process	84
4.3.7	Adsorption kinetics	85
4.3.8	Desorption studies	86
4.4	ADSORPTION OF Ni(II) ION USING <i>AGSNC</i>	90
4.4.1	Effect of contact time and initial Ni(II) ion concentration	90
4.4.2	Effect of <i>AGSNC</i> adsorbent dose	90
4.4.3	Effect of solution pH	91
4.4.4	Effect of the Ionic Strength	91
4.4.5	Adsorption isotherms	92
4.4.5.1	Freundlich isotherm	92
4.4.5.2	Langmuir isotherm	92
4.4.6	Thermodynamic treatment of the adsorption process	93
4.4.7	Adsorption kinetics	93
4.4.8	Desorption studies	94
CHAPTER V	REMOVALS OF CATIONIC DYES	99
5.1	ADSORPTION OF MALACHITE GREEN DYE USING <i>AGSNC</i>	99
5.1.1	Effect of contact time and initial concentration of dye	99
5.1.2	Effect of dosage	99
5.1.3	Effect of pH	100
5.1.4	Effect of ionic strength	100
5.1.5	Adsorption isotherms	101
5.1.5.1	Freundlich isotherm	101
5.1.5.2	Langmuir isotherm	101
5.1.6	Thermodynamic treatment of the adsorption process	102
5.1.7	Adsorption kinetics	102
5.1.8	Desorption studies	103
5.1.9	Evidence of Adsorption	104

5.2	ADSORPTION OF RHODAMINE-B DYE USING <i>AGSNC</i>	111
5.2.1	Effect of contact time and initial concentration	111
5.2.2	Effect of adsorbent dose	111
5.2.3	Effect of pH	112
5.2.4	Effect of ionic strength	112
5.2.5	Adsorption isotherms	113
5.2.5.1	Freundlich isotherm	113
5.2.5.2	Langmuir isotherm	113
5.2.6	Thermodynamic treatment of the adsorption process	114
5.2.7	Adsorption kinetics	115
5.2.8	Desorption studies	116
5.3	ADSORPTION OF METHYLENE BLUE DYE USING <i>AGSNC</i>	120
5.3.1	Effect of contact time and initial concentration	120
5.3.2	Effect of adsorbent dose	120
5.3.3	Effect of pH	121
5.3.4	Effect of ionic strength	121
5.3.5	Adsorption isotherms	122
5.3.5.1	Freundlich isotherm	122
5.3.5.1	Langmuir isotherm	122
5.3.6	Thermodynamic treatment of the adsorption process	123
5.3.7	Adsorption kinetics	123
5.3.8	Desorption studies	124
5.4	ADSORPTION OF SAFRANIN DYE USING <i>AGSNC</i>	129
5.4.1	Effect of contact time and initial concentration	129
5.4.2	Effect of adsorbent dose	129
5.4.3	Effect of pH	130
5.4.4	Effect of ionic strength	130
5.4.5	Adsorption isotherms	131
5.4.5.1	Freundlich isotherm	131
5.4.5.1	Langmuir isotherm	131
5.4.6	Thermodynamic treatment of the adsorption process	132
5.4.7	Adsorption kinetics	132
5.4.8	Desorption studies	133
CHAPTER VI	MECHANISM OF ADSORPTION	138
CHAPTER VII	SUMMARY	139
APPENDIX	REFERENCES	146
	LIST OF PUBLICATIONS	164

LIST OF TABLES

Table Number	TITLE OF THE TABLES	Page Number
1.1	Permeable limits of trace metals in drinking water	5
1.2	Classifications of water pollutants	6
3.1	Weight of respective metal salts for the preparation of stock solution	46
3.2	Weight of respective dyes for the preparation of stock solution	47
3.3	Characterization of the adsorbent	50
3.4	Wave length for the estimation of metal ions/ dyes	51
4.1	Equilibrium parameters for the adsorption of Fe(II) ion onto <i>AGSNC</i>	66
4.2	Langmuir and Freundlich isotherm parameters for the adsorption of Fe(II)	66
4.3	Dimensionless separation factor (R_L)	66
4.4	Thermodynamic parameters for the adsorption of Fe(II) ion onto <i>AGSNC</i>	66
4.5	The kinetic parameters for the adsorption of Fe(II) ion onto <i>AGSNC</i>	67
4.6	Equilibrium parameters for the adsorption of Cu(II) ion onto <i>AGSNC</i>	77
4.7	Langmuir and Freundlich isotherm parameters for the adsorption of Cu(II)	77
4.8	Dimensionless separation factor (R_L)	78
4.9	Thermodynamic parameters for the adsorption of Cu(II) ion onto <i>AGSNC</i>	78
4.10	The kinetic parameter for the adsorption of Cu(II) ion onto <i>AGSNC</i>	78
4.11	Equilibrium parameters for the adsorption of Cr(VI) ion onto <i>AGSNC</i>	86
4.12	Langmuir and Freundlich isotherm parameters for the adsorption of Cr(VI)	86
4.13	Dimensionless separation factor (R_L)	87
4.14	Thermodynamic parameters for the adsorption of Cr(VI) ion onto <i>AGSNC</i>	87
4.15	The kinetic parameters for the adsorption of Cr(VI) ion onto <i>AGSNC</i>	87
4.16	Equilibrium parameters for the adsorption of Ni(II) ion onto <i>AGSNC</i>	95
4.17	Langmuir and Freundlich isotherm parameters for the adsorption of Ni(II)	95
4.18	Dimensionless separation factor (R_L)	95
4.19	Thermodynamic parameters for the adsorption of Ni(II) ion onto <i>AGSNC</i>	96
4.20	The kinetic parameters for the adsorption of Ni(II) ion onto <i>AGSNC</i>	96

5.1	Equilibrium parameters for the adsorption of MG dye onto <i>AGSNC</i>	105
5.2	Langmuir and Freundlich isotherm parameters for adsorption of MG dye	105
5.3	Dimensionless separation factor (R_L)	105
5.4	Thermodynamic parameters for the adsorption of MG dye onto <i>AGSNC</i>	106
5.5	The kinetic parameters for the adsorption of MG dye onto <i>AGSNC</i>	106
5.6	Equilibrium parameters for the adsorption of RhB dye onto <i>AGSNC</i>	116
5.7	Langmuir and Freundlich isotherm parameters for adsorption of RhB dye	116
5.8	Dimensionless separation factor (R_L)	117
5.9	Thermodynamic parameters for the adsorption of RhB dye onto <i>AGSNC</i>	117
5.10	The kinetic parameters for the adsorption of RhB dye onto <i>AGSNC</i>	117
5.11	Equilibrium parameters for the adsorption of MB dye onto <i>AGSNC</i>	125
5.12	Langmuir and Freundlich isotherm parameters for adsorption of MB dye	125
5.13	Dimensionless constant separation factor (R_L)	125
5.14	Thermodynamic parameters for the adsorption of MB dye onto <i>AGSNC</i>	125
5.15	The kinetic parameters for the adsorption of MB dye onto <i>AGSNC</i>	126
5.16	Equilibrium parameters for the adsorption of SF dye onto <i>AGSNC</i>	134
5.17	Langmuir and Freundlich isotherm parameters for the adsorption of SF	134
5.18	Dimensionless constant separation factor (R_L)	134
5.19	Thermodynamic parameters for the adsorption of SF dye onto <i>AGSNC</i>	135
5.20	The kinetic parameters for the adsorption of SF dye onto <i>AGSNC</i>	135
	Comparison of Langmuir constants for the metal ions adsorption	140
	Comparison of Langmuir constants for the dyes adsorption	144
	Comparison of Freundlich constants for the metal ions adsorption	141
	Comparison of Freundlich constants for the dyes adsorption	144
	Comparison of thermodynamic parameters for the metal ions adsorption	142
	Comparison of thermodynamic parameters for the dyes adsorption	145

LIST OF FIGURES

Figure Number	Title of the Figure	Page Number
4.1	Effect of contact time for the removal of Fe(II) ion onto <i>AGSNC</i>	68
4.2	Effect of adsorbent dose for the removal of Fe(II) ion onto <i>AGSNC</i>	68
4.3	Effect of pH for the removal of Fe(II) ion onto <i>AGSNC</i>	69
4.3a	Freundlich adsorption isotherm for the removal of Fe(II)	69a
4.3b	Langmuir adsorption isotherm for the removal of Fe(II)	69a
4.4a	FT-IR Spectrum of <i>AGSNC</i> adsorbent before adsorption	70
4.4b	FT-IR Spectrum of <i>AGSNC</i> adsorbent after adsorption	70
4.5a	XRD Pattern of <i>AGSNC</i> adsorbent before adsorption	71
4.5b	XRD pattern of <i>AGSNC</i> adsorbent after adsorption	71
4.5c	SEM - Image of <i>AGSNC</i> adsorbent before the adsorption(1000x)	71a
4.5d	SEM - Image of <i>AGSNC</i> adsorbent after the adsorption of Fe(II) ion (1000x)	71a
4.6	Effect of contact time for the removal of Cu(II) ion onto <i>AGSNC</i>	79
4.7	Effect of adsorbent dose for the removal of Cu(II) ion onto <i>AGSNC</i>	79
4.8	Effect of pH for the removal of Cu(II) ion onto <i>AGSNC</i>	80
4.9	Effect of other ions for the removal of Cu(II) ion onto <i>AGSNC</i>	80
4.10	Effect of contact time for the removal of Ni(II) ion onto <i>AGSNC</i>	88
4.11	Effect of adsorbent dose for the removal of Ni(II) ion onto <i>AGSNC</i>	88
4.12	Effect of pH for the removal of Ni(II) ion onto <i>AGSNC</i>	89
4.13	Effect of other ions for the removal of Ni(II) ion onto <i>AGSNC</i>	89
4.14	Effect of contact time for the removal of Cr(VI) ion onto <i>AGSNC</i>	97
4.15	Effect of adsorbent dose for the removal of Cr(VI) ion onto <i>AGSNC</i>	97
4.16	Effect of pH for the removal of Cr(VI) ion onto <i>AGSNC</i>	98
4.17	Effect of other ions for the removal of Cr(VI) ion onto <i>AGSNC</i>	98
5.1	Effect of contact time for the removal of MG dye onto <i>AGSNC</i>	107
5.2	Effect of adsorbent dose for the removal of MG dye onto <i>AGSNC</i>	107
5.3	Effect of pH for the removal of MG dye onto <i>AGSNC</i>	108

5.3a	Freundlich adsorption isotherm for the removal of MG dye	108a
5.3b	Langmuir adsorption isotherm for the removal of MG dye	108a
5.4a	FT-IR Spectrum of <i>AGSNC</i> adsorbent before adsorption	109
5.4b	FT-IR Spectrum of <i>AGSNC</i> adsorbent after adsorption	109
5.5a	XRD Pattern of <i>AGSNC</i> adsorbent before adsorption	110
5.5b	XRD pattern of <i>AGSNC</i> adsorbent after adsorption	110
5.6	Effect of contact time for the removal of RhB dye onto <i>AGSNC</i>	118
5.7	Effect of adsorbent dose for the removal of RhB dye onto <i>AGSNC</i>	118
5.8	Effect of pH for the removal of RhB dye onto <i>AGSNC</i>	119
5.9	Effect of contact time for the removal of MB dye onto <i>AGSNC</i>	127
5.10	Effect of adsorbent dose for the removal of MB dye onto <i>AGSNC</i>	127
5.11	Effect of pH for the removal of MB dye onto <i>AGSNC</i>	128
5.12	Effect of contact time for the removal of SF dye onto <i>AGSNC</i>	136
5.13	Effect of adsorbent dose for the removal of SF dye onto <i>AGSNC</i>	136
5.14	Effect of pH for the removal of SF dye onto <i>AGSNC</i>	137
5.15	Effect of other ions for the removal of SF onto <i>AGSNC</i>	137
