List of Tables

3.1 Different parameter values in terms of pixels. .................. 29
3.2 Summary of detection results for various sequences using authors own dataset. .............................................. 36
3.3 Comparison of various detection approaches. .............. 37

4.1 Classification accuracy of different descriptors for BelgiumTSC using $k$-NN classifier. .................................................. 58
4.2 Performance of various methods used to generate the projection matrix. 59
4.3 RA (%) obtained using different combination of methods for different datasets using $k$-NN classifier. .................. 60
4.4 RA (%) obtained using different classifiers on BelgiumTSC dataset. .. 62
4.5 Finally selected features with its $F$-value on BelgiumTSC dataset. .. 64
4.6 HOS features for one-way traffic signs. ......................... 70
4.7 Recognition accuracy obtained on BelgiumTSC and GTSRB datasets. 75
4.8 Performance of different dimension reduction techniques on BelgiumTSC and GTSRB datasets. .................... 75
4.9 State-of-the-art approaches and their descriptions. ............ 78
4.10 Comparison of different methods on BelgiumTSC dataset. ........ 81
4.11 Comparison of different methods on GTSRB dataset. ............ 82
