</table>
4.8.3 Interaction effect of Irrigation and
Phosphorus on stover yield of pea.

4.9 Effect of Irrigation, Nitrogen and
Phosphorus on biological yield and
harvest index in pea.

4.9.1 Interaction effect of Irrigation and
Nitrogen on biological yield of
pea (q/ha).

4.9.2 Interaction effect of Nitrogen and
Phosphorus on biological yield of
pea (q/ha).

4.9.3 Interaction effect of Irrigation and
Phosphorus on biological yield of
pea (q/ha).

4.10 Effect of Irrigation, Nitrogen and
Phosphorus on nitrogen content in
grains and stover in pea.

4.11 Effect of Irrigation, Nitrogen and
Phosphorus on phosphorus content (%)
in grains and stover in pea.

4.12 Effect of Irrigation, Nitrogen and
Phosphorus on nitrogen uptake in pea.

4.13 Effect of Irrigation, Nitrogen and
Phosphorus on phosphorus uptake by
pea.

4.14 Effect of Irrigation, Nitrogen and
Phosphorus on protein content (%) and
protein yield in pea.

4.15 Soil moisture extraction pattern as
influened by Irrigation, Nitrogen and
Phosphorus levels in pea.

4.16 Consumptive use and Water use
Efficiency of pea as effeccted by
Irrigation, Nitrogen and Phosphorus
levels.

4.17 Effect of Irrigation, Nitrogen and
Phosphorus on residual Nitrogen and
Phosphorus in soil.

4.18 Correlation coefficient of yield and
yield parameters of pea during 1993-94.

4.19 Correlation coefficient of yield and
yield parameters of pea during 1994-95.
4.20 Economics of pea production as affected by Irrigation, Nitrogen and phosphorus levels

4.21 Production function and coefficient of determination of grains yield of pea in relation to phosphorus application under the influence of irrigation and Nitrogen

4.22 Expected grain yield (g/ha), gross and net return (Rs/ha) at different levels of phosphorus with or without irrigation treatments using quadratic equation.

4.23 Expected grain yield (g/ha), gross and net returns (Rs/ha) at different levels of phosphorus, with or without Nitrogen treatment using quadratic equation.

4.24 Comparative economics of Phosphorus application at optimum level with or without irrigation and Nitrogen
