ACKNOWLEDGEMENT

It is a great pleasure to convey my gratitude to “them all” in my humble acknowledgement in this thesis.

This piece of work will never be accomplished without God, with His blessings and His power that work within me. You have made my life more bountiful. May your name be exalted, honored and glorified.

In the first place I would like to record my gratitude to my research supervisor, Dr. Prithidipa Sahoo, Assistant Professor, Department of Chemistry, Visva-Bharati, Santiniketan, West Bengal, India, for her supervision, valuable advice, confidence and guidance from the very early stage of this research. Above all and the most needed, she provided me unflinching encouragement and support in various ways. Her truly scientific intuition has made her as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth as a student, a researcher and a scientist want to be. Her simplicity, enthusiasm and dedication will inspire me in each and every moment of my life to move forward. I will never find the words to thank her for her time, co-operation and kind help.

I feel proud to acknowledge Dr. Sukhendu Mandal, Assistant Professor, Department of Microbiology, University of Calcutta, for his valuable guidance, advice and immense support throughout this journey.

I am grateful to our collaborators Prof. Kari Rissanen (University of Jyväskylä, Finland) and Dr. Sudipta Maitra (Department of Zoology, Visva-Bharati) for the X-ray crystallographic studies and biological analysis, respectively.

I would like to thank to Prof. Ajit Kumar Mahapatra (IIEST, Shibpur) and Prof. Swadesh Ranjan Biswas (Visva-Bharati, Santiniketan) for their timely help during my work.

I am thankful to Dr. Kalipada Maiti, Mr. Md. Raihan Uddin and Mr. Pulak Maiti of University of Calcutta, Kolkata, for their cooperation while carrying out the research work.

I acknowledge the University Grants Commission (UGC) for providing me research fellowship.

It was a pleasure to share academic and non-academic experiences with my lab colleagues Mr. Sujoy Das, Ms. Ayndrila Ghosh, Ms. Shampa Kundu and Mrs. Shrabani Saha. Their love and co-operation made our lab a convivial place to work. Special thanks must be given to Sujoy for his continuous support throughout the period of my research work.

I am also grateful to Prof. Pranab Sarkar (HOD) including all the respected faculty members and all non-teaching staff members of our department.
I especially want to thank Prof. Asim Kumar Das, Prof. Gourab Kanti Das, Prof. Goutam Brahmachari, Prof. Bhabatosh Mandal, Prof. Swapan Kumar Chandra and Dr. Alakananda Hajra for their continuous encouragement, advice and affection throughout the entire course of my research work.

I also acknowledge Visva-Bharati, Santiniketan for giving me a lot of scope and infrastructural facilities to complete my research work.

My deepest gratitude goes to my family for their unflagging love and support throughout my life. This dissertation is simply impossible without them. My parents deserve special mention for their inseparable support and prayers. I am indebted to my father Mr. Himangshu Sarkar for his care and love. He spared no effort to provide the best possible environment for me to grow up from my childhood. He had never complained in spite of all the hardships in his life. I cannot ask for more from my mother Mrs. Uma Sarkar, as she is simply perfect. I have no suitable word that can fully describe her everlasting love to me. I always remember her constant support and inspiration when I encountered difficulties. I am very sure that this thesis will make them happier than me.

I would like to extend my gratitude to my elder sister Monalisa and my niece Debarati for their inspiration and enormous love.

I am extraordinarily fortunate for my friend Ms. Urmik Mukherjee, Department of Zoology, Visva-Bharati for helping me in biological studies. Her love, inspiration and persistent confidence in me have taken the load off my shoulder. I owe her for being unselfishly let her intelligence, passions and ambitions collide with mine. Thank you much.

There are some supporting people that I might have forgotten. I convey my humblest apologies to those who consider having earned for themselves being cited amongst these lines.

Lot of Thanks to all of you.
