

Table of contents

List of figures	VII
List of tables	XII
List of plates	XV
1 Introduction	1
1.1 Theme and rationale of the study.....	1
1.2 Statement of the problem.....	5
1.3 Significance of the study.....	9
1.4 Historical account of the Kolong River.....	10
1.4 Review of relevant literature.....	12
2 Objectives, database and methodology	28
2.1 Objectives.....	28
2.2 Working Hypothesis.....	29
2.3 Database.....	30
2.4 Methodology.....	31
3 Geoenvironmental setting of the study area	35
3.1 Location and extent of the study area.....	35
3.2 River system	37
3.2.1 Reach from source to Jagibhakatgaon.....	38
3.2.2 Reach from Jagibhakatgaon to Kajalimukh.....	39
3.3 Longitudinal profile of the Kolong River.....	42
3.4 Navigation potential.....	43
3.5 Geology.....	44
3.6 Hydrogeomorphology.....	45

3.7	Climate.....	48
3.7.1	Temperature.....	50
3.7.2	Rainfall.....	51
3.7.3	Humidity.....	53
3.8	Environmental Quality	54
3.8.1	Water environment.....	54
3.8.1. a.	Surface water.....	54
3.8.1. b.	Ground water.....	55
3.8.1. c.	Waste water generation and disposal.....	58
3.8.2	Air environment.....	61
3.8.3	Soil environment.....	62
3.9	Ecological framework.....	66
3.9.1	Biological diversity.....	66
3.9.1. a.	Fish	66
3.9.1. b.	Avifauna.....	69
3.9.1. c.	Flora.....	72
3.9.2	Landuse/Landcover pattern.....	75
3.10	Human ecology.....	76
3.10.1	Population.....	77
3.10.2	Settlement.....	78
3.10.3	Socio-economic status.....	81
4	Analysis and interpretation	83
4.1	Water Quality assessment.....	83
4.1.1	Water quality analysis.....	84
4.1.1. a.	Sample collection procedure.....	84
4.1.1. b.	Analytical methods.....	85
4.1.1. c.	Result and discussion	86

4.1.2	Water quality index.....	92
4.1.2. a.	WQI analysis.....	93
4.1.2. b.	Results and discussion	95
4.2	Landuse/landcover change detection.....	99
4.2.1	Methodology.....	99
4.2.2	Results and discussion.....	100
4.2.3	Overlay analysis for change detection.....	102
4.3	Relationship between NDVI and precipitation.....	103
4.3.1	Methodology.....	104
4.3.2	Results and Discussion.....	105
4.4	Hydrological analysis.....	109
4.4.1	Q characteristics of Kolong River and its tributaries.....	109
4.4.1. a.	Q measurement by ‘Area-velocity method.....	110
4.4.1. b.	Q estimation at ungauged sites.....	113
4.4.1. c.	Stage-Discharge relationship.....	115
4.4.1. d.	Flow regime of the Kolong River.....	119
4.4.2	Hydrograph analysis.....	132
4.4.2. a.	Runoff characteristics.....	132
4.4.2. b.	Downstream propagation of annual hydrograph...135	
4.4.3	Rainfall-runoff pattern of Kolong Watershed	137
4.4.3.a.	Factors affecting Runoff.....	137
4.4.3.b.	Runoff depth estimation using SCS-CN method....	138
4.4.3.c.	Methodology.....	139
4.4.3.d.	Analysis.....	142
4.4.3.e.	Results and Discussion.....	147
4.4.3.f.	Runoff model calibration and validation.....	150
4.4.4	Sediment load analysis.....	152

4.5	Flood hazard.....	154
4.5.1	Nature of flood and drainage congestion problem.....	155
4.5.2	Flood frequency analysis	156
	4.5.2.a. Design flood estimation.....	157
	4.5.2.b. Return period estimation.....	159
4.6	Channel morphological characteristics.....	160
4.6.1	Bankfull channel geometry.....	161
	4.6.1. a. Methodology.....	162
	4.6.1. b. Results and discussion.....	165
4.7	Channel planform analysis.....	169
4.7.1.	Database used.....	170
4.7.2.	Methodology.....	170
4.7.3.	Measurement of Sinuosity Index (SI).....	171
	4.7.3.a. Results and discussion.....	171
4.7.4	Bank erosion and aggradation along the Kolong River	173
	banks from 1912 to present	
4.7.5	Channel migration pattern.....	178
4.7.6	Channel migration rate.....	182
4.8	Hydraulic geometry analysis.....	185
4.8.1	Methodology.....	186
4.8.2	At-a-station hydraulic geometry relationships.....	188
4.8.3	Downstream direction hydraulic geometry relationships... ..	191
4.9	Wetlands.....	194
4.9.1	Significance of wetlands.....	196
4.9.2	Wetlands of the study area.....	198
4.9.3	Areal extent and spatial changes of wetlands	201
4.9.4	Consequences of altering natural processes	207
	and connectivity	

4.9.5	Floodplain wetland management	211
4.10	Socio-economic appraisal of the study area.....	212
4.10.1	Methodology.....	213
4.10.2	Results and discussion	215
5	River Restoration	223
5.1	Meaning and significance.....	223
5.2	A review of theory and practices.....	225
5.3	Key limitations to river restoration.....	227
6	Restoration modeling and sustainable watershed management	229
6.1	Introduction	229
6.2	Key issues in the Kolong River.....	230
6.3	Potential solutions: methods and approaches.....	232
6.3.1	Flow release plan for the Kolong River.....	232
6.3.2	Design criteria for flood protection embankments.....	239
6.3.2.a.	Steady flow simulation using HEC-RAS.....	239
6.3.3	Quantum of earth work required.....	249
6.3.3.a	Unmanned Aerial Vehicle (UAV) survey.....	250
6.3.3.b	Application of UAV imagery in the present	252
	restoration study	
6.3.4	Reconnection of floodplain habitats for species recovery...	262
6.3.5	Approach to river water quality improvement.....	264
6.4	Geomorphic effects of dyke removal.....	265
6.4.1	Channel response to dyke removal.....	266
6.4.2	Sediment transport associated with dyke removal.....	267
6.5	Ecological effects of dam removal.....	269
6.6	Post-project appraisal.....	270
7	Summary and conclusion	271
