Chapter 1: Human Immunodeficiency Virus -1: an immunological perspective
1.1 Introduction 1
1.2 Epidemiology of HIV-1 2
1.3 HIV classification 3
1.4 Life cycle of HIV-1 4
1.5 An introduction to HIV-1 and its proteins 5
1.6 Biological role of HIV-1 proteins 7
    1.6.1 The structural proteins, Envelope and Gag 7
    1.6.2 The HIV-1 regulatory proteins Tat and Rev 11
    1.6.3 HIV-1 accessory proteins (Nef, Vpr, Vpu and Vif) 15
1.7 Chemokine receptor utilization in HIV infection 18
1.8 Cells of the immune system during HIV infection 19
    1.8.1 HIV-1 infection in antigen presenting cells 19
    1.8.2 HIV-1 infection in Natural Killer cells 23
    1.8.3 HIV-1 infection in T cells 24
    1.8.4 CD8+ T cells 26
1.9 Cytokines in HIV-1 infection 28
1.10 Development of HIV-1 Vaccine 29
1.11 Aims and Objectives 31
1.12 References 33
Chapter 2: Construction of a mammalian bicistronic expression vector expressing gp120 and Tat

2.1 Introduction
   2.1.1 Live attenuated virus or protein-based strategies
   2.1.2 Live viral vector strategy
   2.1.3 Nucleic acid based vaccine strategies
   2.1.4 Prime boost strategy

2.2 Materials and Methods
   2.2.1 Construction of HIV-1 gp120 and Tat expressing bicistronic vector
   2.2.2 Protein expression from the bicistronic vector
   2.2.3 CAT assay
   2.2.4 Protein expression in the DNA immunized mice
   2.2.5 ELISA for gp120
   2.2.6 ELISA for Tat

2.3 Results
   2.3.1 Cloning of gp120 and Tat in a bicistronic vector
   2.3.2 Expression of gp120 and Tat by pIRESgp120-Tat in vitro
   2.3.3 Expression of gp120 and Tat by pIRESgp120-Tat in vivo

2.4 Discussion

2.5 References

Chapter 3: Human Immunodeficiency Virus-1 Tat suppresses gp120 specific T-cell response in IL-10 dependent manner

3.1 Introduction

3.2 Materials and Methods
   3.2.1 Mice and immunization
   3.2.2 Purification of GST-Tat protein
   3.2.3 ELISA for gp120
   3.2.4 ELISA for Isotype analysis
   3.2.5 Preparation of murine splenocytes for CTL assay
   3.2.6 T cell purification
3.2.7 CTL assay by JAM TEST 87
3.2.8 T cell proliferation Assay 87
3.2.9 Cytokine ELISA 88
3.2.10 RT-PCR 88
3.2.11 Statistical Analysis 89

3.3 Results 89
3.3.1 Tat modulates gp120 specific humoral response 89
3.3.2 Induction of gp120 specific cell mediated immune response 90
3.3.3 Tat suppresses proliferation in mice immunized with pIRESgp120-Tat 92
3.3.4 Tat also suppress ovalbumin induced immune response 93
3.3.5 IL-10 produced by the splenocytes mediate the suppressor function 94
3.3.6 gp120 specific antibody response in IL-10−/− mice in presence of Tat 97
3.3.7 IL-10 deficiency augments T cell response in pIRESgp120-Tat immunized mice 99
3.3.8 CD4+ T cell secreted IL-10 reduces the anti-gp120 CTL response in Tat co-immunized mice 101

3.4 Discussion 103
3.5 References 106

Chapter 4: IL-12 is necessary for the priming of CD4+ T cells required during the elicitation of gp120 specific CTL function

4.1 Introduction 111
4.2 Material and Methods 113
4.2.1 Plasmid preparation 113
4.2.2 Mice and immunization 113
4.2.3 RT-PCR 113
4.3 Results 114
4.3.1 gp120 mediated immune response in wild type and IL-12 114
4.3.2 IL-12 is required during priming of CTL and APC derived IL-12 during restimulation is not useful for elicitation of gp120 specific CTL

4.3.3 gp120 specific primed CD4$^+$ T cells are required for CTL effector function

4.3.4 IL-12 vector restores the CD4$^+$ T cell priming and help of CD8$^+$ T cells

4.4 Discussion
