ACKNOWLEDGEMENTS

The endless thank goes to God Almighty for all the blessings he has showered on me. He has blessed me with extraordinary people who have uplifted my thesis to a whole new level. I want to express my heartiest gratitude to the supervisor of my Ph.D. thesis, Professor (Dr.) Imtiaz Ali Khan, whose constructive criticism, valuable comments and thought-provoking remarks enabled, me to get deep into the process of research, from him I have learned to think critically, to select problems, to solve them and to present their solutions and complete my thesis successfully and my co-supervisor, Professor. (Dr.) Mohammed Ali, with each meeting with him, added invaluable aspects to the implementation and broadened my perspective. He has guided me with his invaluable suggestions, lightened up the way in my darkest times and encouraged me a lot in the academic life.

I would express my deep sense of gratitude to Er. Mohd. Anas Anees for helping such an astonishing and bewildering LabVIEW programs which are identical to that of real AGV and ASRS interfaces. I am deeply indebted by Er. Mohd. Syed Rehan for lending a hard for analyzing data and for giving me so much time out of his busy schedule.

Every research activity is a joint academic endeavor. No thesis will come to fruition without multiple involvements. Many individuals and departments have contributed to my research intellectually, socially and emotionally. It would have been impossible to complete this research without their advice, guidance, inputs and support. I am indebted to all of them. I know that in spite of all my efforts, I am not able to mention everyone here. I offer my sincere apologies for such lapse.

I want to thank all the professors, colleagues and technical staff in the Ergonomic Division, MED, ZH CET, A.M.U. Aligarh, for pleasant conversation during tea and lunch breaks and occasional gathering.

It is with sincere gratitude that I wish to thank Professor (Dr.) Altamush Siddiqui, Chairperson, Mechanical Engineering Department, A.M.U. Aligarh for making available this excellent CIM & FMS lab, the support and encouragement extended to me during my period of research in the department.
Acknowledgements

My parents have passed on to me wonderful humanitarian lineage, whose value cannot be measured by any worldly yardstick. I chose not to follow his advice on using ‘speed’ rather than ‘velocity’.

Lastly but not least, I am without words to thank my mother ‘Mrs. Shaista Khanam’ and life partner, ‘Mrs. Tabassum’, for all their love and constant support, for all the late nights and early mornings and for keeping me sane over the past few years and for their understanding and patience while I was far from home during the period of my research in the college. They have supported me in each and every way, believe in me permanently and inspired me in all dimensions of life. I owe you everything.

I am blessed with two wonderful little flowers Aarish and Tabish for putting them in such a difficult situation particularly last few years they patiently bore with equanimity my prolonged absence and extended their emotional support to me throughout. Their sacrifices and love have no parallels. I wish to express my deepest love and thanks to them
All of you made it possible for me to reach last this last stage of my endeavor. Thank You from my heart-of-hearts.

-SHAHNAWAZ MOHSIN
