CONTENTS

2.3.2.1 Computer generated data file .......................... 34
2.3.2.2 Event waveform generator .............................. 36
  2.3.2.2.1 Microcontroller in event generator module .......... 36
  2.3.2.2.2 Digital to analog data conversion (DAC) ............. 36
2.3.2.3 Analog data processing stage .......................... 37
2.3.2.4 Driver Stage ........................................ 37
2.3.2.5 Pulse Generator ..................................... 38
2.4 Description of Power Quality Event Monitoring Module .... 38
2.5 Summary .................................................. 39

3 Identification and classification of Single Power Quality Events 41
  3.1 Introduction ............................................. 41
  3.2 Scheme of Single Power Quality event identification and classification ........................................ 42
    3.2.1 Cross-Correlation Based Feature Extraction ............ 43
    3.2.2 Rough Set Theory for Minimum Feature Selection and Decision Rule Generation ........................ 47
      3.2.2.1 Information system ................................ 47
      3.2.2.2 Indiscernibility relation .......................... 48
      3.2.2.3 Set Approximation ................................. 48
      3.2.2.4 Selection of reduct and core ....................... 52
  3.3 Results and Discussions .................................. 55
    3.3.1 Identification and classification of Power Quality Events ........................................ 55
      3.3.1.1 Step 1: The data table is discretized and dispensable attributes are removed .......... 56
      3.3.1.2 Step 2: Judge the potential of decision rules ........................................ 56
      3.3.1.3 Step 3: Reducts and Core are obtained ........... 58
      3.3.1.4 Step 4: Decision rules are generated from the final table of Core and Reducts .......... 58
  3.4 Effect of noise on the performance of Classifier .......... 62
  3.5 Conclusion ............................................. 62

4 Identification and classification of Mixed Power Quality Events 64
  4.1 Introduction ............................................. 64
