2.1 Direct hepatotoxins ............................................................. 35
2.2 Indirect hepatotoxins .......................................................... 36
4.1 \textit{In vitro} antioxidant activity of the extracts of \textit{N. sphaeroides} .......... 109
4.2 Effect of ethanol extract of \textit{N. sphaeroides} on croton oil induced lipid peroxidation on mouse skin .................................................. 109
5.1 Effect of ethanol, methanol and aqueous extract of \textit{N. sphaeroides} on formalin induced paw edema in mice ................................. 125
5.2 Effect of ethanol, methanol and aqueous extract of \textit{N. sphaeroides} on carrageenan induced paw edema in mice ................................................. 127
5.3 Effect of ethanol extract of \textit{N. sphaeroides} on croton oil induced skin inflammation in mice ............................................................. 128
6.1 Effect of ethanol extract of \textit{N. sphaeroides} on liver function marker enzymes (AST and ALT) in serum of rats against CCl4 induced acute toxicity .................................................. 150
6.2 Effect of ethanol extract of \textit{N. sphaeroides} on liver function marker enzymes (ALP and GGT) in serum of rats against CCl4 induced acute toxicity .................................................. 151
6.3 Effect of ethanol extract of \textit{N. sphaeroides} on liver function marker enzymes (AST and ALT) in serum of rats against CCl4 induced chronic toxicity .................................................. 152
6.4 Effect of ethanol extract of \textit{N. sphaeroides} on liver function marker enzymes (ALP and GGT) in serum of rats against CCl4 induced chronic toxicity .................................................. 152
6.5 Effect of ethanol extract of \textit{N. sphaeroides} on the activity of antioxidant enzymes (SOD and catalase) in liver of rats against CCl4 induced chronic toxicity .................................................. 154
6.6 Effect of ethanol extract of \textit{N. sphaeroides} on the activity of antioxidant enzymes (GPx and GST) in liver of rats against CCl4 induced chronic toxicity .................................................. 155
6.7 Effect of ethanol extract of \textit{N. sphaeroides} on the activity of antioxidant enzymes (SOD and catalase) in kidney of rats against CCl4 induced chronic toxicity .................................................. 155
6.8 Effect of ethanol extract of \textit{N. sphaeroides} on the activity of antioxidant enzymes (GPx and GST) in kidney of rats against CCl4 induced chronic toxicity .................................................. 156
6.9 Effect of ethanol extract of \textit{N. sphaeroides} on the activity of antioxidant status of liver of rats against CCl4 induced chronic toxicity .................................................. 158
6.10 Effect of ethanol extract of *N. sphaeroides* on the activity of antioxidant status of kidney of rats against CCl₄ induced chronic toxicity. ................................................................. 158

6.11 Effect of ethanol extract of *N. sphaeroides* on the activity of GSH status of liver, kidney and blood of rats against CCl₄ induced chronic toxicity. ................................................................. 160

6.12 Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (total lipid and phospholipid) of serum of rats against CCl₄ induced chronic toxicity. ................................................................. 161

6.13 Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (cholesterol and triglyceride) of serum of rats against CCl₄ induced chronic toxicity. ................................................................. 161

6.14 Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (total lipid and phospholipid) of liver of rats against CCl₄ induced chronic toxicity. ................................................................. 162

6.15 Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (cholesterol and triglyceride) of liver of rats with CCl₄ induced hepatotoxicity. ................................................................. 162

6.16 Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (total lipid and phospholipid) of kidney of rats against CCl₄ induced chronic toxicity. ................................................................. 163

6.17 Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (cholesterol and triglyceride) of kidney of rats against CCl₄ induced chronic toxicity. ................................................................. 163

6.18 Effect of ethanol extract of *N. sphaeroides* on protein and bilirubin in serum of rats against CCl₄ induced chronic toxicity. ................................................................. 165

6.19 Effect of ethanol extract of *N. sphaeroides* on liver function marker enzymes (AST and ALT) in serum of rats against paracetamol induced toxicity. ................................................................. 167

6.20 Effect of ethanol extract of *N. sphaeroides* on liver function marker enzymes (ALP and GGT) in serum of rats against paracetamol induced toxicity. ................................................................. 168

6.21 Effect of ethanol extract of *N. sphaeroides* on the activity of antioxidant enzymes (SOD and catalase) in liver of rats against paracetamol induced toxicity. ................................................................. 169

6.22 Effect of ethanol extract of *N. sphaeroides* on the activity of antioxidant enzymes (GPx and GST) in liver of rats against paracetamol induced toxicity. ................................................................. 169

6.23 Effect of ethanol extract of *N. sphaeroides* on the activity of antioxidant enzymes (SOD and catalase) in kidney of rats against paracetamol induced toxicity. ................................................................. 170
Effect of ethanol extract of *N. sphaeroides* on the activity of antioxidant enzymes (GPx and GST) in kidney of rats against paracetamol induced toxicity. ................................................................. 170

Effect of ethanol extract of *N. sphaeroides* on the activity of antioxidant status of liver of rats against paracetamol induced toxicity. ......................................................................................... 172

Effect of ethanol extract of *N. sphaeroides* on the activity of antioxidant status of kidney of rats against paracetamol induced toxicity. .......................................................................................... 173

Effect of ethanol extract of *N. sphaeroides* on the activity of GSH status of liver, kidney and blood of rats against paracetamol induced toxicity ......................................................................................... 174

Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (total lipid and phospholipid) of serum of rats against paracetamol induced toxicity. ................................................................. 175

Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (cholesterol and triglyceride) of serum of rats against paracetamol induced toxicity. ................................................................. 176

Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (total lipid and phospholipid) of liver of rats against paracetamol induced toxicity. ................................................................. 176

Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (cholesterol and triglyceride) of liver of rats against paracetamol induced toxicity. ................................................................. 177

Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (total lipid and phospholipid) of kidney of rats against paracetamol induced toxicity. ................................................................. 177

Effect of ethanol extract of *N. sphaeroides* on the activity of lipid profile status (cholesterol and triglyceride) of kidney of rats against paracetamol induced toxicity. ................................................................. 178

Effect of ethanol extract of *N. sphaeroides* on protein and bilirubin in serum of rats against paracetamol induced toxicity. ................................................................. 181

Effect of ethanol, methanol and aqueous extracts of *N. sphaeroides* on total WBC, RBC counts and haemoglobin concentration. ................................................................. 227

Effect of ethanol, methanol and aqueous extracts of *N. sphaeroides* on liver functions marker enzymes in serum. ................................................................. 227

Effect of ethanol, methanol and aqueous extracts of *N. sphaeroides* on serum urea and creatinine concentration. ................................................................. 228
