Acknowledgement

In the identification of the thesis, different treatments and its developments, the support given by my mentor and guide Dr. C. T. Aravindakumar, Reader, School of Chemical Sciences, Mahatma Gandhi University was exceptional. In spite of all his constraints as a teacher and a research guide and an invited lecturer in India and abroad, he was deeply involved in the preparations of the research publications and the thesis. I am indebted greatly for the service rendered by Dr. C. T. Aravindakumar in the completion of my thesis.

I would like to express my heartfelt gratitude to the Director, School of Chemical Sciences, Mahatma Gandhi University and all the faculty members for providing necessary facilities, academic support and co-operation.

I express my deep sense of gratitude to Dr. Usha K. Aravind for her valuable help and suggestions during my work.

I would like to thank the Director and members of Radiation Chemistry and Chemical Dynamics Division, Bhabha Atomic Research Centre, Mumbai for providing pulse radiolysis facilities.

I wish to express my thanks to Mr. I. John Britto, Rubber Research Institute of India for his help during $\gamma$-radiolysis.

I am very much thankful to Dr. Ashok Kumar, Dr. Susheela Mathew and Dr. Toms C. Joseph, Central Institute of Fisheries Technology, Kochi for the LC-MS/MS analysis facilities.

I am very much grateful to my lab mates for their invaluable help, co-operation and encouragement.

I am very much indebted to my husband, children, parents and all family members for their support and encouragement throughout my research.

Above all, adoration, praise and glory to The Most Holy Trinity for all the support from The Heaven during the whole work. I am dedicating this thesis to The Eucharistic Heart of Jesus Christ and to The Immaculate Heart of Holy Mary.

Rani Varghese
