## List of Schemes

1.1. Radiolysis of water ........................................ 19

4.1. Reaction pathway of TMT with \( \cdot \text{OH} \) ................. 90

4.2. Reaction pathway of DHT with \( \cdot \text{OH} \) ................. 92

4.3. Mechanisms of generation of identified products of the reaction of DHT in the photolysis of Fe(III)/UV ........................................ 103

4.4. Mechanisms of generation of identified products of the reaction of CA in the photolysis of Fe(III)/UV ........................................ 108

5.1. Degradation pattern of cyanuric acid on gamma radiolysis and in the combined field of gamma radiolysis and Fenton reaction ........................................ 127

5.2. Generation of 4-amino-1,3,5-triazin-2-ol from the gamma radiolysis of AT in presence of added Fe(II) ........................................ 136

6.1. Reaction of e\(^{-}\)\(_{aq}\) with urracil derivatives ............... 154

6.2. Reaction of e\(^{-}\)\(_{aq}\) with DHT ........................................ 155

6.3. Formation of 1,3,5-triazine and 1-H-1,2,4-triazole ............. 168

6.4. Formation of 5-chloro-2,3-dihydro-1-H-1,2,4-triazol-5-ol .................. 169

6.5. Formation of 4-chloro-N-ethenyl-1,3,5-triazin-2-amine .......... 170

6.6. Formation of \( N \)-ethenyl-\( N' \)-(1-methylethenyl)-1,3,5-triazine-2,4-diamine 171

6.7. Formation of 5-chloro-\( N \)-ethyl-2,3-dihydro-1\( H \)-1,2,4-triazol-3-amine ........................................ 172

6.8. Formation of 2-chloro-1,3,5-triazine ............................. 173

6.9. Formation of \( N \)-(1-methylethenyl)-1,3,5-triazin-2-amine .......... 174
