Acknowledgement

I express my heartfelt gratitude to my supervising teacher Prof. (Dr.) Sabu Thomas, School of Chemical Sciences, Mahatma Gandhi University for his invaluable guidance, motivation and encouragement during the entire course of my research work. It has been a great pleasure for me to work under his supervision. I am indebted to him for the helpful discussions and the various opportunities provided to me. I would like to express my sincere thanks to my supervising teacher Dr. Jacob Abraham, Department of Chemistry, Mar Thoma College, Tiruvalla, for his wholehearted support and valuable advice.

I wish to thank the Management and the Chemistry Department of Mar Thoma College, Tiruvalla for their earnest co-operation in providing the facilities for conducting a part of the research. I express my gratitude to Prof. George Mathew, former Head of the Chemistry Department, for the support extended to me during my research work. Also, I am thankful to Dr. Abraham Varghese, Head of the Chemistry Department, for his timely support and co-operation.

I am also thankful to Dr. K. N. Ninan, Deputy Director, VSSC, Thiruvananthapuram, for his kind permission to procure the liquid rubbers for the work. I am indebted to Dr. P. Sasidharan Achary for suggestions and discussions regarding the research topic.

I am thankful to Prof. (Dr.) Paula Molderaers, Department of Chemical Engineering, Katholieke Universiteit Leuven, Belgium, for permitting to do rheology studies in her laboratory and for providing financial support during my stay there. I express my sincere gratitude to Prof. (Dr.) Gabriel Groeninckx, Laboratory of Macromolecular Structural Chemistry, Katholieke Universiteit Leuven, Belgium, for permitting to do DMTA and DSC measurements in his laboratory. I remember with gratitude the help of Dr. Tolib Omonov and Mr. Rene Stratmonds to complete rheology and SEM analyses. I greatly acknowledge the help of Dr. Jürgen Pionteck, Leibniz-Institute of Polymer Research, Dresden,
Germany, for his kind permission to perform SALLS and PVT measurements and for arranging financial assistance during my stay there. Also I express my thanks to Mr. Helfred Kunnathu for his assistance in conducting some experimental work in the laboratory.

I am thankful to Dr. Christophe Sinturel and Mr. Sebastien Durix, Centre de Recherché Sur la Matière Divisée, Université d'Orléans, France, for their help in conducting DSC analyses in their laboratory. Also I express my gratitude to Prof. (Dr.) Yves Grohé, Centre d’Étude et de Recherche en Thermique, Environnement et Systèmes, Université Paris 12 Val de Marne, France, for the completion of Nanoindentation analyses. I am indebted to Dr. Abderrahim Boudenne, Centre d’Étude et de Recherche en Thermique, Environnement et Systèmes, Université Paris 12 Val de Marne, France, for his valuable help in conducting Thermophysical studies. I am also thankful to Prof. (Dr.) Tibor Czigány and Dr. F. Ronkay, Department of Polymer Engineering, Budapest University of Technology and Economics, Hungary, for the analyses of fracture mechanism by Acoustic Emission Spectroscopy. I would like to express my deep gratitude to Mr. He Yuelong and Dr. DingYumei, College of Mechanical and Electrical Engineering, Beijing University of Chemical Technology, Beijing 100029, P.R. China, for their help in conducting certain mechanical and thermal measurements in their laboratories. I express my sincere thanks to Prof. (Dr.) K.E. George, Head, Department of Polymer Science and Rubber Technology, Cochin University of Science and Technology, for the permission to perform certain mechanical measurements in his laboratory. Also, I am thankful to Prof. (Dr.) Bhohidar, Department of Biophysics, JNU, New-Delhi, for the permission to do light scattering studies.

I thank the Kerala State Council for Science, Technology, and Environment (KSCSTE) for the SRF project. I would also like to extend my sincere thanks to the directors and personnel of Huntsmann, Mumbai, for their timely supply of chemicals as gift samples.
This work would not have been possible without the unstinting support extended to me by my colleagues. My deep gratitude and sincere thanks are due to my dear friends Dr. Bejoy Francis, Mr. Jyothish Kumar, Dr. Selvin Thomas, Dr. Aju Joseph, Jesny Jose, Anu Tresia Sunny, Meera A. P, Dr. Bindu P and Dr. A. Santhosh Kumar. I am also thankful to Vijju Susan Mathew, Sherly Annie Paul, Indira K. N., Dr. Anil Kumar and Shaji Joseph, Dr. Marias Idiculla, and Dr. Susan Joseph, Joyce Thomas and Sree Prasanth. I thank Dr. Abraham C. Varghese and Mr. Sreejith for their help in computer works. I also thank Shiju and Sholly for lab and computer assistance.

Finally, I express my deep sense of gratitude and regard to all the members of my family whose prayers, affection, encouragement, inspiration, patience and support spurred me on my path towards the successful completion of this research work. I am thankful to my cousins, Mr. Raju George and Mr. Laji K. Varghese, for their efforts to arrange chemicals. Also, I express my gratitude to my father-in-law Mr. K. C. Easo for his constant support and prayers. My hearty thanks to my wife Santhi and daughters Tintu and Ann for their unconditional love, care, affection, motivation, encouragement and support which always energised me during the entire research work.

Thanks are due to Shibu K.V. and Unni. Minitek Computer, for the valuable help in word-processing this thesis.

I would like to put on record and thank one and all who have directly or indirectly extended their kind cooperation and support throughout my research work.

At this juncture, I humbly bow before the Almighty God for showering His blessings on me, and for giving me the strength and wisdom to reach this milestone in my life.

Raju Thomas
