

List of figures

Figure No.	Description	Page No.
Fig.2.1	Simple DC R-L Circuit	28
Fig.2.2	R-L circuit transient with DC excitation	29
Fig.2.3	Simple AC R-L circuit	29
Fig. 2.4	Simple DC R-C Circuit	30
Fig. 2.5	Voltage and current wave-shapes for the R-C circuit	30
Fig.2.6	MATLAB simulation of R-L-C series Circuit	31
Fig. 2.7	The system, restriking and transient recovery voltage	32
Fig. 2.8	Saturable reactor	33
Fig. 2.9	Equivalent circuit model of the saturable reactor	33
Fig.2.10	Nonlinear Circuit	33
Fig. 2.11	Piecewise linearization of saturation	34
Fig. 2.12	Graph of Nonlinear Circuit by MATLAB-Simulation	35
Fig. 2.13	FFT analysis of non-linear Circuit	38
Fig.2.14	Non linear circuit using snubber	39
Fig.2.15	Current and voltage vs. time of the nonlinear circuit using snubber	39
Fig.2.16	Long transmission line using SPD	42
Fig.2.17	Series compensation	42
Fig. 2.18	Performance of long transmission line using SPD	43
Fig.2.19	The nature of performance variables	44
Fig. 2.20	Snubber circuit	48
Fig. 2.21	Switching waveforms	49
Fig. 2.22	Voltage and current distributions in long transmission lines	51
Fig. 2.23	Transient recovery voltage	52
Fig. 2.24A	2-bus system	54
Fig. 2.24B	The study case- transient stability actions	55
Fig. 2.25	Percent bus nominal Kv vs. time	55
Fig. 2.26	Machine current vs. time	56
Fig. 2.27	Electric power vs. time	56
Fig.2.28	Acceleration power vs. time	57
Fig 2.29	Percent machine rated Kv vs. time	57
Fig. 3.1	Distributed nature of parameters in a long transmission line	61
Fig. 6.1	Feeder line with capacitive compensation	109
Fig. 6.2	Long transmission line with inductive compensation	114
Fig. 7.1	A generator-transformer connected to infinite bus through a short transmission line.	127
Fig. 7.2	Generator configuration in Bandel Thermal Power Station	127
Fig. 7.3	Block diagram representation of exciter- model IEEE 1s.	131
Fig. 10.1	Block diagram of a monopole system with earth return	172
Fig. 10.2	Block diagram of a bipolar system that also has an earth return	173
Fig. 10.3	Block diagram of homopolar link	174
