

## List of Tables

<b>Table No.</b>	<b>Table Heading</b>	<b>Page No.</b>
Table 4.1	E/E <sub>d</sub> versus F	80
Table 4.2	No. of disks against line voltage in Kv	80
Table 7.1	Elements of State-Matrix A(7,7)*1000: case-1	135
Table 7.2	Routh's tabulation	135
Table 7.3	Elements of State-Matrix A(7,7)*1000: case-2	136
Table 7.4	Elements of State-Matrix A(7,7)*1000: case-3	138
Table 7.5	State-Matrix for the reduced order model	139
Table 7.6	Routh's tabulation for the reduced order model	140
Table 8.1	Asynchronous variables for varying slip, fixed discharge resistance, fixed input voltage: turbogenerator	151
Table 8.2	Asynchronous variables for varying discharge resistance, given reference power & given static droop: turbogenerator	151
Table 8.3	Asynchronous variables for fixed discharge resistance, Givenreferencepower, and varyingvoltage: turbogenerator.	152
Table 8.4	Asynchronous variables for varying slip, fixed discharge resistance, fixed input voltage: hydrogenerator.	153
Table 8.5	Asynchronous variables for fixed discharge resistance, Givenreference power, and varyingvoltage: hydrogenerator	154
Table9.1	Line data for 6-bus system	162
Table 9.2	Bus-data for condition-I	163
Table 9.3	Voltage profile for condition-I	163
Table 9.4	Line flow for condition-I	164
Table 9.5	Bus-data file for condition-II	164
Table 9.6	Voltage profile for condition-II	165
Table 9.7	Line flow for condition-II	165
Table 9.8	Bus data file for condition-III	166
Table 9.9	Voltage profile for condition-III	166
Table-9.10	Line flow for condition - III	167
Table 10.1	DC Voltage versus delay and extinction angle	179

References and bibliography	200
