Preface and Acknowledgement

The present thesis is a humble attempt to study ‘Autoregressive processes with convolutions of Gaussian and non-Gaussian marginal distributions and their applications’. But for the unstinted and whole hearted support and assistance extended and rendered by innumerable personalities and institutions, this work could not have been undertaken and completed.

I wish to express my profound sense of gratitude and indebtedness to my supervising teacher Dr. K.K.Jose, formerly Reader and Head of the Research and Postgraduate Department of Statistics, St. Thomas College, Palai and presently the Principal of the college without whose support, valuable guidance and constant encouragement, this work would not have been accomplished. I am really fortunate to have enjoyed full academic freedom under his supervision. A vast depository of knowledge, he remained as an unfailing source of strength and inspiration in completing my work with his paternal love and affection. No words are strong enough and no letters are bold enough to express my heartfelt thanks to my beloved supervising teacher.

I sincerely acknowledge all my teachers in the Department of Statistics, St. Thomas College, Palai, for the encouragement and creative suggestions throughout the work. I would like to express my deep sense of gratitude to Rev. Dr. Mathew John Kokkatt, former Principal, St.Thomas College, Palai for the unreserved patronage extended to me all through the study.

I have greatly benefitted from my discussions with Professor A.M. Mathai, McGill University, Canada; Professor Bovas Abraham, Waterloo University, Canada; Professor Hans Houbold, Office for Outer Space Affairs, UN, Vienna; Professor Serge B. Provost, Western Ontario University, Canada and Dr. B.D. Acharya, former Advisor, Mathematical Sciences Division, Department of Science and Technology, Government of India. I acknowledge their scholarly advice and valuable suggestions in shaping the contents of my study.

I am extremely grateful to the International Statistical Institute for selecting me for the ‘Jan Tinbergen Award 2007’ for young statisticians during the tenure of my present work. I also express my sincere gratitude to the Kerala Statistical Association for encouraging me by selecting for the ‘Dr. R.N. Pillai Young Statistician Award 2006’. I sincerely acknowledge the financial support from the
University Grants Commission, New Delhi, in the form of JRF and SRF during the period of my research.

I owe a great deal to Rev. Dr. Joseph Maleparampil, Manager and Dr. Tharsis Joseph, Principal of Deva Matha College, Kuravilangad, where I am presently employed, for their constant support and motivation. I remember with gratitude the inspiration from my teacher Professor N.K. Thomas, who taught me the first lessons of statistics. I will always nurse in mind the encouragement extended to me in various ways by my teachers and colleagues at Deva Matha College, Kuravilangad.

I am grateful to the Librarian and Office staff of St. Thomas College, Palai for their help and co-operation. I sincerely acknowledge the help extended to me by my fellow research scholars and a special thanks to Ms. Ajithakumari M.S., Technical Assistant, Department of Statistics, St. Thomas College, Palai.

In completing this project work, I have had the blessings and prayers of my father Tomy and mother Aleyamma, who lighted the spark of knowledge in my mind during the childhood days itself. I also thank my brother Linton and inlaws for their patience, whole hearted support and encouragement during this endeavour.

It is with deep sense of love and strong feelings of gratitude that I recall the encouragement and endurance so overwhelmingly expressed by my husband Deepu Jose Sebastian at each and every stage of this work. He has been always with me as my strength and power.

Words are not sufficient to record the countless blessings that have been showered upon me by the Lord Almighty. His rod and his staff have always led and protected me; I raise my heart and bend my knees in gratitude to him.

Lishamol Tomy
