</table>
4.9. Pressure derivatives of second-order elastic constants of Cu-Al-Be ..........89
4.10. Third-order potential parameters of Cu-Al-Pd (TPa).................................90
4.11. Third-order elastic constants of Cu-Al-Pd [TPa]......................................90
4.12. Pressure derivatives of second-order elastic constants of Cu-Al-Pd ..............91
4.13. Potential parameters for various interactions............................................91
6.1. Generalized GP and wave velocity for elastic waves propagating at different angles $\theta$ to the crystal axis in Cu-Al-Ni ..............................................118
6.2. Lattice thermal expansion ($\gamma_L$) and Anderson-Gruneisen parameter ($\delta$) for Cu-Al-Ni..........................................................120
6.3. Generalized GP and wave velocity for elastic waves propagating at different angles $\theta$ to the crystal axis in Cu-Al-Zn.............................121
6.4. Lattice thermal expansion ($\gamma_L$) and Anderson-Gruneisen parameter ($\delta$) of Cu-Al-Zn .................................................................123
6.5. Generalized GP and wave velocity for elastic waves propagating at different angles $\theta$ to the crystal axis in Cu-Al-Be ..................124
6.6. Low temperature limit of lattice thermal expansion ($\gamma_L$) and Anderson-Gruneisen parameter ($\delta$) of Cu-Al-Be .........................126
6.7. Generalized GP and wave velocity for elastic waves propagating at different angles $\theta$ to the crystal axis in Cu-Al-Pd...................127
6.8. Low temperature limit of lattice thermal expansion ($\gamma_L$) and Anderson-Gruneisen parameter ($\delta$) of Cu-Al-Pd .........................129
