

## LIST OF TABLES

Table No.	Title	Page No.
3.1	Primer sequences used for amplification of <i>Salmonella</i> -specific gene, <i>invA</i>	54
3.2	Primer sequences used for amplification of the virulence genes under study	56
3.3	Cycling Conditions used for multiplex PCR	57
3.4	Composition of pcr reaction mixture used in multiplex PCR	57
3.5	Composition of pcr reaction mixture	59
3.6	Details of Vaccine Formulation, Dose, Concentration and Route of administration in different groups of mice.	86
3.7	Details of Challenge Organism, Dose and Route of Challenge in Different Groups of Mice.	89
4.1	Isolation of <i>Salmonella</i> from human and different species of animals and birds	91
4.2	Distribution of various serovars among <i>Salmonella</i> isolates recovered from different sources	92
4.3	Virulence gene profile of standard strains of <i>Salmonella</i>	94
4.4	Virulent gene profile of field isolates of <i>Salmonella</i>	95
4.5	Mean antibody titre (log value) of different groups of mice injected with recombinant InvH protein and bacterin vaccine of <i>Salmonella</i>	125
4.6	Protection of mice immunised with recombinant InvH protein of <i>Salmonellae</i> and bacterin vaccine of <i>Salmonella</i>	126
