

## LIST OF FIGURES

- Fig.3.2.1a. Percentage of germination of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.1b. Inhibition on germination of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.2a. Length of radicle of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.2b. Inhibition on length of radicle in *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.3a. Length of hypocotyl of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.3b. Inhibition of length of hypocotyl in *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.4a. Vigour index of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.5a. Phytotoxicity of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.6a. Height of the *Capsicum* plants on 30th day after treatment with various concentrations of FA3.2.6b. Inhibition of height of *Capsicum* plants on 30th day after treatment with various concentrations of FACT effluent
- Fig.3.2.7a. Height of the *Capsicum* plants on 60th day after treatment with various concentrations of FACT effluent
- Fig.3.2.7b. Inhibition of height of the *Capsicum* plants on 60th day after treatment with various concentrations of FACT effluent
- Fig.3.2.8a. Height of the *Capsicum* plants on 90th day after treatment with various concentrations of FACT effluent
- Fig.3.2.8b. Inhibition of height of the *Capsicum* plants on 90th day after treatment with various concentrations of FACT effluent
- Fig.3.2.9a. Height of the *Capsicum* plants at harvest after treatment with various concentrations of FACT effluent
- Fig.3.2.9b. Inhibition of height of the *Capsicum* plants at harvest after treatment with various concentrations of FACT effluent
- Fig.3.2.10a. Number of leaves in *Capsicum* plants on 30th day after treatment with various concentrations of FACT effluent
- Fig.3.2.10b. Inhibition of number of leaves in *Capsicum* plants on 30th day after treatment with various concentrations of FACT effluent

- Fig.3.2.11a. Number of leaves in *Capsicum* plants on 60th day after treatment with various concentrations of FACT effluent
- Fig.3.2.11b. Inhibition in number of leaves in *Capsicum* plants on 60th day after treatment with various concentrations of FACT effluent
- Fig.3.2.12a. Number of branches in *Capsicum* plants on 30th day after treatment with various concentrations of FACT effluent
- Fig.3.2.12b. Inhibition of number of branches in *Capsicum* plants on 30th day after treatment with various concentrations of FACT effluent
- Fig.3.2.13a. Number of branches in *Capsicum* plants on 60th day after treatment with various concentrations of FACT effluent
- Fig.3.2.13b. Inhibition of number of branches in *Capsicum* plants on 60th day after treatment with various concentrations of FACT effluent
- Fig.3.2.14a. Days taken to flower of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.14b. Inhibition of days taken to flower in *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.15a. Number of fruits/plant of *Capsicum* after treatment with various concentrations of FACT effluent
- Fig.3.2.15b. Reduction in number of fruits/plant of *Capsicum* after treatment with various concentrations of FACT effluent
- Fig.3.2.16a. Weight of fruits of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.16b. Reduction in weight of fruits of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.17a. Length of fruits of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.17b. Reduction in length of fruits of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.18a. Number of seeds/ fruit of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.18b. Reduction in number of seeds/fruits of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.19a. Length of root at harvest of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.19b. Inhibition of length of roots of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.20. Stomatal index of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.2.21. Phytomass of *Capsicum* plants after treatment with various concentrations of FACT effluent

- Fig.3.2.22. Net Primary Productivity of *Capsicum* plants after treatment with various concentrations of FACT effluent
- Fig.3.3.1. Content of chlorophyll a (mg/g) at vegetative period of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.3.2. Content of chlorophyll b (mg/g) at vegetative period of *Capsicum* plants when treated with various concentrations of FACT effluent
- Fig.3.3.3. Total chlorophyll (mg/g) at vegetative period of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.3.4. Carotenoid content (mg/g) at vegetative period of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.3.5. Content of chlorophyll a (mg/g) at flowering of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.3.6. Content of chlorophyll b (mg/g) at flowering of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.3.7. Total chlorophyll (mg/g) at flowering of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.3.8. Carotenoid content (mg/g) at flowering of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.3.9. Content of chlorophyll a (mg/g) at fruiting of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.3.10. Content of chlorophyll b (mg/g) at fruiting of *Capsicum* plants when treated with various concentrations of FACT effluent
- Fig.3.3.11. Total chlorophyll (mg/g) at fruiting of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.3.12. Carotenoid (mg/g) at fruiting of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.4.1. Total protein content (mg/g) at vegetative period of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.4.2. Total protein content (mg/g) at flowering of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.4.3. Total protein content (mg/g) at fruiting stage of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.5.1. Carbohydrate content (mg/g) at vegetative period of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.5.2. Carbohydrate content (mg/g) at flowering of *Capsicum* plants treated with various concentrations of FACT effluent
- Fig.3.5.3. Carbohydrate content (mg/g) at fruiting of *Capsicum* plants treated with various concentrations of FACT effluent
