CONTENTS

List of Tables
List of Figures
List of Appendices

Chapter I Introduction ......................................................... 1-19
  1.1 Background of the Study .............................................. 2
  1.2 Need and Importance of the Study ................................. 8
  1.3 Statement of the Problem ............................................ 11
  1.4 Definition of Key Terms ............................................. 11
  1.5 Objectives of the Study ............................................. 12
  1.6 Hypotheses Formulated for the Study ............................. 14
  1.7 Scope of the Study ................................................... 15
  1.8 Limitations of the Study ........................................... 16
  1.9 Organisation of the Report ......................................... 17
       References ................................................................... 18

Chapter II Theoretical Overview ............................................. 20-43
  2.1 Disadvantaged Children .............................................. 21
  2.2 Educational Diagnosis ............................................... 26
  2.3 Diagnostic Assessment ............................................... 30
2.4 Remedial Programmes ........................................... 36
2.5 Remedial Measures for the Disadvantaged children .......... 39

Chapter III Review of Related Literature ............................ 44-89

3.1 Similar research studies carried out which are directly or indirectly related with the topic under investigation .......................................... 46

3.2 Related literatures/projects which help us to clarify the concepts involved in the study and bring to light the opinions proposed by eminent persons in the field ................................................. 69

Reference ........................................................................ 75

Chapter IV Methodology ..................................................... 90-146

4.1 Method Adopted for the Study ........................................... 91

4.2 Variables of the Study .................................................... 93

4.3 Sample for the Study ..................................................... 94

4.4 Tools used for the Present Study ....................................... 97

4.5 Development of Socio-Economic Scale Data Sheet ........... 99

4.6 Preparation of Achievement Test in Mathematics .......... 102

4.7 Diagnostic Tests in Mathematics. .................................... 112

4.8 Remedial Programmes in Mathematics ......................... 122

4.9 Focus Group Discussion - Process Details ...................... 137

4.10 Administration of Tools ............................................. 138

4.11 Focus Group Discussion ............................................. 139

4.12 Statistical Treatment of Data ....................................... 141

Reference ........................................................................ 145
Chapter V Analysis and Interpretation .................................. 148-214

5.1 Introduction ........................................................................ 148

5.2 Analysis of Socio-Economic Status Scale Data Sheet .... 150

5.3 Analysis of Focus Group Discussion ................................. 151

5.4 Analysis based on the Diagnostic Test .............................. 160

5.5 Analysis based on the Performance in the
Achievement Test .................................................................. 181

5.6 Effectiveness of Remedial Programmes ......................... 190

Chapter VI Summary, Findings and Conclusion ................. 215-244

Part I Objectives and Design ................................................. 216

6.1 Study in Retrospect ......................................................... 216

6.2 Objectives of the Study .................................................. 216

6.3 Hypotheses of the Study ............................................... 218

6.4 Sample for the Study ..................................................... 219

6.5 Design of the Study ....................................................... 220

6.6 Tools used for the present Study ..................................... 220

6.7 Summary of the Procedures adopted ............................... 220

6.8 Statistical Techniques and Methods of Analysis .............. 222

Part II Conclusions ................................................................. 223

6.9 Conclusions Based on the Findings ................................. 223

6.10 Tenability of the Hypotheses ......................................... 241
Part III  Suggestions ................................................................. 241

6.11  Suggestions Based on the Findings ................................. 241
6.12  Suggestions for Implementation....................................... 241
6.13  Suggestions for further Research ..................................... 243

Bibliography

1. Books
2. Journals
3. Theses and Research Papers

Appendices

1. Socio-Economic Scale Data Sheet
2. Achievement Tests in Mathematics
3. Diagnostic Tests in Mathematics
4. Remedial Programmes
5. Direct Instruction Plan
6. Focus Group Discussion Document
7. List of Experts and Teachers
