Contents

Introduction 1

Summary of the thesis 8

Chapter 1. Preliminaries 11

1.1. Categories 11

1.2. Topological groups 15

1.3. Lattices and Frames 19

Chapter 2. Introduction to frame-groups 32

2.1. A review of topological groups 32

2.2. Frame-groups 34

2.3. Multiplication of opens by points 45

2.4. Neighbourhood bases in frame-groups 51

Chapter 3. More on frame-groups 55

3.1. A review of topological groups 55

3.2. Subgroup of a frame-group 58
3.3. Quotient group of a frame-group 63

3.4. Product of two frame-groups 67

Chapter 4. Optimal frame-groups 78

4.1. Optimal frame-groups 78

4.2. Connectedness, compactness and regularity in optimal frame-groups 82

Chapter 5. Bohr-type compactification of Hausdorff frame-groups 92

5.1. A review of topological semigroups. 92

5.2. Dense continuous homomorphisms 96

5.3. Bohr-type compactification of Hausdorff frame-groups 99

Chapter 6. Dual of a frame-group 112

6.1. A review of topological groups 112

6.2. Dual of a frame-group 115

Conclusion 132

Bibliography 134
