Abstract
List of Tables and Figures
List of Figures
List of Appendices
Abbreviations

Chapter 1
INTRODUCTION ........................................................................... 01 - 16
  1.1 Ground Water ................................................................ 04
    1.1.1 Ground water potential of Kerala .......................... 09
  1.2 Surface Water ................................................................. 11
  1.3 Municipal Water Supply (Water in the Distribution System) 13
  1.4 Significance of the Study .................................................. 14
  1.5 Objectives of the Study ..................................................... 15

Chapter 2
REVIEW OF LITERATURE ......................................................... 17 - 41
  2.1 Ground Water ................................................................. 17
    2.1.1 Ground water quality: Global (1992-2006) ............... 17
    2.1.2 Ground water quality: other parts of India (1990-2007) 20
    2.1.3 Ground water quality: Kerala (1983-2007) ............... 29
  2.2 Surface Water ................................................................. 33
    2.2.1 Surface water: Global (1994-2006) ......................... 33
    2.2.2 Surface water: India (1985-2007) ............................ 34
    2.2.3 Surface water: Kerala (2000-2007) ......................... 38

Chapter 3
MATERIALS AND METHODS .................................................. 42 - 57
  3.1 Study Area ..................................................................... 42
    3.1.1 Ground water and other drinking water sources ........ 45
    3.1.2 River waters ......................................................... 45
    3.1.3 Water in the distribution system of three municipalities 46
  3.2 Survey ............................................................................ 47
    3.2.1 Water usage profile ............................................... 47
  3.3 Water Analysis ............................................................... 48
    3.3.1 Water sample collection ....................................... 48
    3.3.2 Physico-chemical analysis .................................... 54
    3.3.3 Bacteriological analysis ....................................... 55
  3.4 Water Quality Index ....................................................... 56
  3.5 Water Quality Modeling ............................................... 57
Chapter 4
RESULTS ........................................................................ 58 - 187

4.1 Survey ........................................................................ 58
   4.1.1 Drinking water sources ........................................... 58
   4.1.2 Sanitation facilities .................................................. 59
   4.1.3 Water borne diseases .............................................. 59

4.2 Water analysis ............................................................... 63

4.2.1 Ground water quality in tribal stations (TS), rural stations (RS) and other drinking water sources (OS) in tribal areas. ....................... 63
   4.2.1.1 Physico-chemical factors ..................................... 63
   4.2.1.2 Bacteriological factors ......................................... 68
   4.2.1.3 Fluoride and Heavy metals in ground water and other drinking water sources .................................................. 92
   4.2.1.4 Correlations between water quality factors of tribal stations .......................................................... 95
   4.2.1.5 Correlations between water quality factors of rural stations .......................................................... 95
   4.2.1.6 Correlations between water quality factors in other drinking water sources of tribal areas ............... 96
   4.2.1.7 Variations of physico-chemical and bacteriological parameters ..................................................... 97
   4.2.1.8 Distribution of faecal coliforms in ground water at tribal stations, rural stations and other drinking water sources in tribal areas .... 99
   4.2.1.9 Sanitation and bacterial load in ground water sources ................................................................. 101

4.2.2 Water quality of river waters ........................................ 103
   4.2.2.1 Assessment of water quality of river ACHENCOVIL .... 103
      4.2.2.1.a Physico-chemical factors .................................. 103
      4.2.2.1.b Bacteriological factors ...................................... 105
      4.2.2.1.c Correlation between water quality factors .......... 113
   4.2.2.2 Assessment of water quality of river PAMBA ............ 113
      4.2.2.2.a Physico-chemical factors ................................... 113
      4.2.2.2.b Bacteriological factors ....................................... 115
      4.2.2.2.c Correlation between water quality factors .......... 123
   4.2.2.3 Assessment of water quality of river MANIMALA ....... 123
      4.2.2.3.a Physico-chemical factors ................................... 123
      4.2.2.3.b Bacteriological factors ....................................... 125
      4.2.2.3.c Correlation between water quality factors .......... 132
   4.2.2.4 Assessment of water quality of Tributaries of PAMBA .. 132
      4.2.2.4.a Physico-chemical and bacteriological factors ...... 132
      4.2.2.4.b Correlation between water quality factors .......... 139
   4.2.2.5 Fluoride and Heavy metals in river waters .................. 139
   4.2.2.6 Variations between rivers ...................................... 140
4.2.3 Water quality in the distribution system (Municipal water supply)

4.2.3.1 Adoor Municipality
   4.2.3.1.a Physico-chemical factors
   4.2.3.1.b Bacteriological factors
   4.2.3.1.c Correlation between water quality factors

4.2.3.2 Pathanamthitta Municipality
   4.2.3.2.a Physico-chemical factors
   4.2.3.2.b Bacteriological factors
   4.2.3.2.c Correlation between water quality factors

4.2.3.3 Thiruvalla Municipality
   4.2.3.3.a Physico-chemical factors
   4.2.3.3.b Bacteriological factors
   4.2.3.3.c Correlation between water quality factors

4.2.3.4 Fluoride and heavy metals in the water of distribution system

4.2.3.5 Variations between water quality factors in the distribution system of municipalities

4.3 Water quality indices

4.3.1 Ground water at tribal stations (TS)
4.3.2 Ground water at rural stations (RS)
4.3.3 Other drinking water sources in tribal areas (OS)
4.3.4 WQI of river waters
4.3.5 WQI of water in distribution system of three municipalities

4.4 Water quality modeling

4.4.1 Modeling of ground water
   4.4.1.1 Modeling of ground water at tribal stations (TS)
   4.4.1.2 Modeling of ground water at rural stations (RS)
   4.4.1.3 Modeling of other drinking water sources at tribal areas (OS)

4.4.2 Modeling of river waters
   4.4.2.1 Achencovil river (AC)
   4.4.2.2 Pamba river (P)
   4.4.2.3 Tributaries of Pamba

4.4.3 Modeling of water in the distribution system of municipalities
   4.4.3.1 Adoor (AD)
   4.4.3.2 Pathanamthitta (PA)
   4.4.3.3 Thiruvalla (TV)

Chapter 5
DISCUSSION........................................................................ 188 - 218

5.1 Survey 189
5.2 Water analysis 190
   5.2.1 Physico – chemical parameters 190
   5.2.2 Bacteriological factors 210
5.3 Water quality indices (WQI) 214
5.4 Correlation analysis and modeling 215
5.5 Sanitation 216
5.6 Potability of water 217

Chapter 6
SUMMARY AND CONCLUSION .................................. 219 - 226

6.1 Water in the tribal stations 219
6.2 Water in the rural stations 220
6.3 River waters 221
6.4 Water in the distribution system 221
6.5 Sanitation 222
6.6 Water borne diseases 223

BIBLIOGRAPHY ..................................................................227 - 253

APPENDIX I - V .................................................................254 - 267

Papers presented and published ........................................ 268
