4.39 Mean score opinion of the women entrepreneurs of various types of government services utilised on the major development of ‘Better price for the products’ ..................................................................................203
4.40 ANOVA for measuring the impact of various government supportive services for the major development of ‘Better price for the products’ of ready to wear garment units.................................................205
4.41 Post-Hoc Tests comparison using Scheffe’s multiple comparison on the major development of ‘Better price for the products’ .......................206
4.42 Mean score opinion of the women entrepreneurs of various types of government services utilised on the major development of ‘expansion of the concern’ ........................................................................207
4.43 ANOVA for measuring the impact of various government supportive services for the major development of ‘expansion of the concern’ of ready to wear garment units .......................................................208
4.44 Post-Hoc Tests comparison using Scheffe’s multiple comparison on the major development of ‘Expansion of the concern’ ..........................209
4.45 Mean score opinion of the women entrepreneurs of various types of government services utilised on the major development of ‘increased sales’ .......................................................................................210
4.46 ANOVA for measuring the impact of various government supportive services for the major development of ‘increased sales’ of ready to wear garment units .............................................................................211
4.47 Post-Hoc Tests comparison using Scheffe’s multiple comparison on the major development of ‘Increased Sales’ ........................................212
4.48 Mean score opinion of the women entrepreneurs of various types of government services utilised on the major development of ‘reduction in cost’ .................................................................213

4.49 ANOVA for measuring the impact of various government supportive services for the major development of ‘reduction in cost’ of ready to wear garment units .................................................................214

4.50 Post -Hoc Tests comparison using Scheffe’s multiple comparison on the major development of ‘reduction in cost’ .................................................................215

4.51 Mean score opinion of the women entrepreneurs of various types of government services utilised on the major development of ‘efficient management’ .................................................................216

4.52 ANOVA for measuring the impact of various government supportive services for the major development of ‘efficient management’ ready to wear garment units .................................................................217

4.53 Post -Hoc Tests comparison using Scheffe’s multiple comparison on the major development of ‘efficient management’ .................................................................218

4.54 Type of Financial institutions/agencies approached by women entrepreneurs ..................................................................................................................221

4.55 Sources of information about lending scheme of financial institutions ...... 223

4.56 Type of lending schemes utilised by women entrepreneurs ............................224

4.57 Level of satisfaction of women entrepreneurs in the lending schemes ...... 225

4.58 Reasons for satisfaction in the lending schemes ........................................226

4.59 Reasons for dissatisfaction in the lending scheme ......................................227

4.60 Development of readymade garments units with the help of financial institutions ..................................................................................................................228

4.61 Major problems encountered by sample units at initial stage .....................231

4.62 Major problems encountered by units at present: By nature of ownership ..................................................................................................................233

4.63 Major problems encountered by units at present: By Location of Business ..................................................................................................................234

4.64 Total Capital investment in the enterprise .................................................237

4.65 Distribution of sample units based on sources of finance ...........................239

4.66 Sources of self finance for starting the enterprise ....................................240

4.67 Sources of Borrowed funds ........................................................................242

4.68 Share of borrowed funds in the total investment at the initial period of the women entrepreneurs in readymade garment industry .........................243
4.69 Share of borrowed funds in the total investment at the present period of the women entrepreneurs in readymade garment industry.................................244
4.70 Type of financial Problems of the women Entrepreneurs in Readymade Garment units.................................................................245
4.71 Reasons for not getting adequate credit.........................................................246
4.72 Ownership type and Seriousness of the problem “lack of collateral Security”.................................247
4.73 Type of Location of Readymade Garment units and Seriousness of the problem “lack of collateral Security” .........................................................249
4.74 Market area coverage of RMG units ................................................................252
4.75 Nature of marketing channels of RMG units .................................................253
4.76 Nature of Demand of Readymade garment units ...........................................255
4.77 Entrepreneurs opinion about market competition in readymade garment units .........................................................................................257
4.78 Media used for advertisement in readymade garments.........................................259
4.79 Nature of marketing problems and its seriousness experienced by sample units.........................................................................................263
4.80 Ownership type and Seriousness of the problem “Rivalry from competitors” .........................................................................................264
4.81 Type of Location of Readymade Garment units and Seriousness of the problem “Rivalry from competitors” .........................................................266
4.82 Element of cost of different garment................................................................275
4.83 Nature of production problems and its seriousness experienced by sample units.........................................................................................279
4.84 Ownership type and Seriousness of the problem “High cost of Production” .........................................................................................281
4.85 Type of Location of Readymade Garment units and Seriousness of the problem “High cost of Production” .........................................................................................283
4.86 Distribution of labour force based on nature of employees......................286
4.87 Labour recruitment of RMG units.................................................................287
4.88 Sources of labour.........................................................................................288
4.89 Nature of labour problem of women entrepreneurs in readymade garment industry.........................................................................................290
4.90 Level of technology of sample units.................................................................295
