ACKNOWLEDGEMENTS

To commence with, I pay my obeisance to GOD, the Almighty to have bestowed upon me good health, courage, inspiration, zeal and the light. I thank the GOD almighty for giving me the strength and patience to work through all these years.

I express my sincere and deepest gratitude to my supervisor, Dr. Vishal Gupta, Sr. Assistant Professor, University Institute of Engineering and Technology (UIET), Panjab University, Chandigarh (India) who has been a tremendous mentor to encourage me to undertake this research. His expertise, invaluable guidance, constant encouragement, affectionate attitude, understanding, patience and healthy criticism added considerably to my experience. I would also like to thank Professor Savita Gupta, Director, UIET, Panjab University for providing research and infrastructural support.

I feel a deep sense of gratitude to my Late mother Sdn. Inderjeet Kaur who formed part of my vision and taught me the good things that really matter in life. The happy memories of my mother still provide me with persistent inspirations for my journey in this life. Words fall short to pen down my feelings for my father S. Gurjit Singh who has always provided me with constant encouragement, divine presence and supporting me spiritually throughout.

I owe thanks to a very special person my wife Poonam Gagneja for her continued and unfailing love, support, and understanding. She was always around at times when I thought that it was impossible to continue. I greatly value her contribution and deeply appreciate her belief in me. I appreciate my baby, my little girl, Manreet Kaur Gagneja, who is the apple of my eye for abiding my ignorance and the patience she showed during my research. Words were never said how grateful I am to both of you. I consider myself the luckiest in the world to have such a lovely and caring family standing beside me with their love and unconditional support.

My heartfelt regard to my father-in-law, S. Charanjeet Singh Sodhi, and mother-in-law, Kiran Sodhi for their love and support.
I would also like to thank my friend Ranjit Singh Dadhwal for his valuable and useful suggestions during the various phases of this research work. I am immensely indebted and sincerely admire the contribution of my fellow researchers, Dinesh Singla, Mahak Gambhir, Raahat Davender Singh for fruitful discussions during my research.
