ACKNOWLEDGEMENTS

It is the enthusiasm to know the unknown led the man to unravel the mysteries of nature. An ecologist by profession, naturally I took this study for the PhD programme when I got the opportunity. Moreover, I am living in Kuttanad so I want to know the science behind the problems and phenomena taking place in this wetland.

Unless I was a student of my first supervising teacher Late Dr. R. Satheesh from the post graduate level, I might not have been to this area of research. I am extremely indebted to him for allowing me to carry out the study under his supervision. His support and encouragement was the greatest strength in my research. He gave all support in field work, lab work and data analysis till his departure in April 2006. My present supervising teacher Dr. K. Sankaran Unni was the focal point of support in continuing the research. His deep knowledge and international accomplishments in the field helped me a lot. I deeply indebted to him in this endeavour. My colleagues Mr. Sylas V. P., Mr. Joby Paul and Mr. Subhash T. K. helped me in the collection, photography and identification of specimens and preparation of herbaria and field work.

I express my sincere gratitude to Dr. A. P. Thomas, former Professor and Director, School of Environmental Sciences, Mahatma Gandhi University for his constant attention, encouragement and providing necessary facilities. I am also thankful to Dr. E. V. Ramasamy, Reader and present Director of SES and Dr. A. A. Mohamed Hatha, Reader, Cochin University of Science and Technology for valuable suggestions and encouragement. I appreciate other teaching and non teaching staff of SES, M.Sc. students and M.Phil, Ph.D. scholars especially Mrs. Mary Jaimol Antony, Mrs. Nisha P. V., Mr. Vijith H., Mr. Rejith P. G., Mr. Mujeeb Rahiman, Dr. Abhirosh Chandran, Mr. B. Ajay Kumar, Mr. Mahesh Mohan and Mr. Rakesh P. S. for their help rendered during the work.

The valuable suggestions and information given by Dr. K. G. Padmakumar and Dr. N. K. Sasidharan of Regional Agricultural Research Station, Kerala Agricultural University, Kumarakom are greatly appreciated. I appreciate the timely help of Dr. A. K. Pradeep, Dept. of Botany, Calicut University, Malappuram, Dr. R. Ansari, Director, Mr. P. A. Krishnan, Research Scholar of Malabar Botanical Garden, Kozhikode and Mr. Sanil Kumar M. G. Research Scholar, Cochin University of Science and Technology for taxonomic identification of macrophytes. The help rendered by Dr. Sunil C. N., Reader, Dept. of Botany, SNM College Maliankara in the preparation of the field identification key is invaluable. The service rendered by Mr. Sreenath M. for his assistance in field work are gratefully acknowledged.

I am grateful to many researchers who have provided me all the published literature on my request especially Dr. Brij Gopal of Jawaharlal Nehru University and Dr. Imelda Somodi of Eotvos Lorand University, Budapest.

I am ever thankful to my family, society and almighty who shaped me up to this level

Last but not least I would like to thank the financial assistance from Ministry of Environment and Forests as senior research fellowship (J–22012/23/2003-W dt. 16.10.2003).

John C. Mathew
